LINE CHECK REDONDO AVE

NOTE: A preliminary investigation of the line of Redondo Ave shows that points now existant vary widely from the straight line established by Redondo Ville Tract B in [illegible]. A straight line between the L&t at Gould Lane and the L&t @ Manhattan Beach Blvd was established and the offsets to points found were taken as shown below. From this information I find that the introduction of an angle point at Curtis Ave and 0.04 E of the intersection of ties shown in M.B.C.E.F.B. - is warrented. This latter line is the line shown as center line Redondo Ave ~~in the preceding~~ on pages 55 & 56, 61 & 62, 67 & 68 and 73 & 74.

NOTE: Per instructions of F.H. Blanchard the line of Redondo Ave will be the straight line between The L&t at Gould Ln. (No Ref) and the L&t at Manhattan Beach Blvd (TR). This line is shown on pages 163-170.

NOTES

1) Tags set read "L.A. CO. ENG'R."

2) Data shown on pages 203 to 225 is intended to supplement that shown on pages 57, 59, 63 65, 69, 71, 75 & 75 (also showing Herrin St) and does NOT supercede it.

3) The purpose of this phase of this survey is to determine the line of Herrin St and to show its relation to the line of Redondo Ave & Aviation Blvd.

4) An evaluation of the points found indicates that there is now an angle point in the line of Herrin at or near 2ND St. ~ This is not in conformity with Redondo Villa Tract "B"

5) The following points were held to in establishing the line of the Street:

a) At Manhattan Beach Blvd ~ The int. of lines shown in the Manhattan Beach City Engineers Field Book (MBCEFB). This point falls at appr. prop dist. between Peck Ave & Redondo Ave.

b) At 2ND St. ~ The S/L E/L ~ This point falls at approx. prop dist. between the ctr. of Sec (@ Peck) and the E 1/4 Cor (@ Aviation) both of which appear rather certain as to position.

c) At Gould Lane ~ The L.E.L on the 5 ft offset line ~ this point falls in general conformity with other points found along both Herrin St. & Gould Lane
