Dear Earth Day Participant,

On behalf of the SEA Lab and the City of Redondo Beach Department of Public Works, I would like to thank you for your participation in our seventh annual Earth Day Celebration. On April 19th, we hosted over 2,500 visitors at the SEA Lab, including Southern California residents, tourists, elected officials and local business leaders. The event proved to be a huge success: over 140 pounds of trash was collected during the volunteer beach clean-up and over three dozen community and environmental organizations shared their message to the earth with interested community participants.

We greatly appreciate your contribution in helping make the Earth Day Celebration a success for everyone involved. A program of the LA Conservation Corps, the SEA Lab is home to a variety of programs which include rescuing and rehabilitating injured marine life, habitat restoration featuring native and drought resistant plants that we raise in our nursery, educational field trips for students in grades K-12 and job training for young adults who are interested with working in conservation and education. Thank you again for your participation. We look forward to partnering again with you soon!

Sincerely,

Kris Perez & Rachel Schaar
