California Urban Water Conservation Council

# Achieving a New Normal in California Landscapes

Two gatherings to accelerate the pace of change toward more sustainable landscapes in California

Join us for a day of ideas, discussions, and problem solving.

**May 22, 2014 Southern CA** | **May 29, 2014 Northern CA**

Etiwanda Gardens, Rancho Cucamonga

8:00 a.m. – 5:00 p.m.

Citrus Heights Community Center, Citrus Heights

It is widely known that reforming California's urban landscapes to use less water, fewer chemicals, and more climate-appropriate plants will yield huge benefits to our state in terms of water conservation, runoff and pollutant reduction, human health, and biodiversity.

Around the state, agencies, organizations and individuals are partnering to implement sustainable landscapes and reap the many benefits for their communities. Learn from their experiences, and join in the conversation about how we can make sustainable landscapes the "new normal" in California.

Get inspired. Join the conversation. Take action!

## Cost

$45 before May 8

$55 on or after May 8

## To register

http://landscape-south.eventbee.com

http://landscape-north.eventbee.com

## Spend the day:

- **Learning** from successful case-studies
- **Hearing** about current and planned projects from **state agencies**
- **Identifying barriers** to change and **finding solutions** to overcome them
- **Building valuable partnerships**
- **Defining** an action plan for moving forward

## Who should attend:

Anyone who is **dedicated to making landscapes more sustainable**, especially representatives from:

- Water agencies/providers
- Non-profit organizations
- County/state/federal agencies
- Professional associations
- Landscape industry
- Stormwater management

A collaborative effort of the CA Urban Water Conservation Council and:
