

# San Gabriel Valley Airport

## Serving General Aviation and the San Gabriel Valley since 1936

Located in the heart of the San Gabriel Valley, San Gabriel Valley Airport, formerly known as El Monte Airport, facilitated over 85,000 general aviation aircraft takeoffs and landings in 2018. The airport is home to over 300 based aircraft and numerous aviation businesses. With an Air Traffic Control Tower operating daily, state-of-the-art navigational aids, and an advanced weather reporting Automated Weather Observing System (AWOS), the airport safely and efficiently accommodates a wide range of fixed-wing and rotary-wing aircraft ranging from small two-seat, single-engine propeller aircraft up to much larger and higher capacity turbo-prop and jet aircraft.

Owned and operated by the County of Los Angeles, the airport is self-sufficient. All income generated by the County at the airport is reinvested back into the airport or the County's system of airports.

Within the last year, the County invested over \$5 million in various capital improvement projects at the airport, including the comprehensive rehabilitation of 48

acres of paved apron. The majority of funding for the various capital projects comes from Federal Airport Improvement Program grants or State grants from the California Department of Transportation Division of Aeronautics. Additional funding for capital and other projects comes from the County's Aviation Enterprise Fund.

Overall, the airport plays a vital role in the nation's integrated system of airports and is a valuable asset to the local communities, serving the diverse constituents of the San Gabriel Valley and the broader County of Los Angeles.
