OWNER-BUILDER INFORMATION

The State Health and Safety Code mandates that the "Owner-Builder Information" form be completed by the property owner prior to the issuance of any permits after July 1, 1980.

An application for a building permit has been submitted in your name listing you as the builder of the property improvements specified.

For your protection you should be aware that as "Owner-builder" you are the responsible party of record on such a permit. Building permits are not required to be signed by property owner unless they are personally performing their own work. If someone other than yourself is performing your work, you may protect yourself from possible liability if that person applies for the proper permit in his or her name.

Contractors are required by law to be licensed and bonded by the State of California and to have a business license from the City or County. They are also required by law to out their license number on all permits for which they apply.

If you plan to do your own work, with the exception of various trades that you plan to subcontract, you should be aware of the following information for your befit and protection:

- If you employ or otherwise engage any persons other than your immediate family, and the work (including materials and other costs) is $200 or more for the entire project, and such persons are not licensed as contractors or subcontractors, then you may be an employer.
- If you are an employer, you must register with the State and Federal Government as an employer and you are subject to several obligations including state and federal income tax withholding, federal social security taxes, workers' compensation insurance, disability insurance, and unemployment compensation contributions.
- There may be financial risks for you if you do not carry out these obligations, and these risks are especially serious with respect to workers' compensation insurance. Please contact your homeowner's insurance carrier for coverage.
- For more specific information about your obligations under federal law, contact the Internal Revenue Service (and, if you wish, the U.S. Small Business Administration). For more specific information about your obligations under State law, contact the Department of Benefit Payments and the Division of Industrial Accidents.

If the structure is intended for sale, property owners who are not licensed contractors are allowed to perform their work personally or through their own employees without a licensed contractor or subcontractor, only under limited conditions.

A frequent practice of unlicensed persons professing to be contractors is to secure an "owner-builder" building permit, erroneously implying that the property owner is providing his or her own labor and material personally. Building permits are not required to be signed by property owners unless they are performing their work personally.

Information about licensed contractors may be obtained by contacting the Contractors' State License Board in your community or at 1020 "N" Street, Sacrament, California 95814.

Please complete and return the enclosed "Owner-Builder Verification" form so that we can confirm that you are aware of these matters. The building permit will not be issued until the verification is returned.

SEWER BACKWATER VALVE PROTECTION DETERMINATION

Job Address: 4046-48 107th St. Inglewood

Section 710.1 of the Los Angeles County Plumbing Code requires that drainage piping serving plumbing fixtures which have flood level rims located below the elevation of the next upstream manhole cover of the public or private main sewer serving such drainage piping shall be protected from backflow of sewage by installing an approved type **backwater valve.**

It is the responsibility of the permitee to determine whether the relative elevations of the plumbing fixtures and sewer manhole cover at this jobsite are such that a **backwater valve** is required.

I, Ignacio Michel, (print) the LICENSED CONTRACTOR / OWNER (circle one) have reviewed the conditions at the jobsite and have determined that:

- ☐ A **backwater valve** is required and is installed.
- ☐ No **backwater valve** is required. The flood level rim of all plumbing fixtures is above the next upstream manhole cover.
