

**2014 Finding of Conformance Proposal for the
Azusa Land Reclamation Landfill
Preliminary Comments from Mr. Mike Mohajer**

Listed below are Mr. Mohajer's preliminary comments on the 2014 Azusa Land Reclamation Landfill Finding of Conformance Proposal:

1. "Site plan", Figure No's 2 and 3 are incomplete. A site plan must show adjacent streets, entrance/exit, scale house, office, etc. In addition the site plan must also show the WM's MRF/Transfer Station and access road to the said facility.
2. Item 2, Page 2 – It has been indicated the Landfill is located in the Cities of Azusa and Irwindale. As such, the Site Map must clearly identify the two cities' jurisdictional boundaries.
3. Item 3, Page 2 – It has been stated that the Landfill is a Class III landfill operating as an inert debris landfill. It would be helpful to indicate that because of the LARWQCB requirements, facility essentially cannot operate as a Class III Landfill (possibly Zone V, in the future.)
4. Item 3, 2nd Paragraph, Page 2 – Define the "base grades" elevations within the Zone V. Additionally, has the LARWQCB issued a WDR for the landfilling operation in Zone V?
5. Item 3, 1st Paragraph, Page 3 – It has been stated that "A maximum of 8,000 tons per day and 39,000 tons per week (an overall average of 6,500 tons per day (tpd) for six operating days) of materials can be accepted at Azusa Landfill." This statement is contrary to the requirements of the Task Force FOC granted on May 16, 1996. Specifically, Condition #1 of the FOC states "Daily maximum tonnage of solid waste materials, including contaminated soil, delivered to the site for landfilling, recycling, salvaging, processing and/or use as landfill daily cover will be limited to 6,500 tons per day, six days per week" The FOC requirements were established based on the CEQA documents and traffic studies. These discrepancies need to be addressed prior to granting an FOC.
6. Item 5, PP 3 & 4 – See Item 3, above.
7. Item 5, Page 5, 1st Paragraph – Define "at the end of normal business hours."
8. Figures 6 and 7 need to have "North" arrow and/or a street name shown.
