Conformance Proposal,
Amended August 2008**

4. Project Design Capacity

The total design capacity of the City/County Landfill is estimated to be 141.2 million cubic yards, of which approximately 50.7 million cubic yards is presently permitted in the existing City and County landfills. Thus, approval of the City/County Landfill will add approximately 90.5 million cubic yards of permitted capacity to the facility. The total estimated amount of solid waste to be disposed in the City/County Landfill is approximately 91.1 million tons.

5. Waste Material to be Handled

The waste types received at SCL consist of non-hazardous residential, commercial, and inert/exempt waste classified in accordance with 27 CCR, Sections 20220 and 20230, defining Class III and inert wastes. The municipal solid waste categories are described as follows:

- Mixed Municipal Solid Wastes (including commercial and residential waste);
- Non-hazardous industrial wastes;
- Construction/Demolition wastes that may be disposed of or are beneficially used and not disposed in the landfill; and
- Green Wastes that are beneficially used and not disposed in the landfill.

Typical residential non-hazardous solid waste includes, but is not limited to, household refuse, tree and lawn clippings, leaves and brush, scrap lumber and metal, appliances, furniture, wood chips, plastic containers, newspapers, cardboard and glass containers. Commercial and industrial waste typically includes, but is not limited to, food wastes, paper, corrugated cardboard, plastic, rubber, glass, mixtures of concrete, asphalt, wood, steel, brick and block.

Universal wastes (fluorescent lamps, CRTs, instruments that contain mercury, batteries, and electronics) are prohibited for disposal at the site. SCL also does not landfill compostable material (other than incidental compostable material mixed with other landfilled loads) as defined in 14 CCR, Section 17850 as "any organic material that when accumulated will become active compost as defined in 14 CCR, Section 17852(a)(I)" nor does SCL accept biosolids, untreated medical waste or asbestos wastes.

The site may accept up to 6,600 tons per week of total exempt clean soil and waste for beneficial use (e.g., asphalt rubble and processed green material).
