Subject: Sediment Management Meeting on April 18th

Good Afternoon,

Our next meeting to discuss Sediment Management will be held on Monday, April 18, 2011, at Public Works Headquarters in Alhambra from 1:30 to 4:30pm. As shown on the attached agenda, we will be having a time for Public Works to listen to the concerns that many of you have already shared about the overall project development process. We will also be giving more details regarding the upcoming sediment removal projects as well as soliciting feedback on the draft screening tool which will help analyze sediment management alternatives for future projects. We have also attached January's meeting summary. Feel free to provide us comments or corrections.

Please RSVP by using the voting buttons or replying to this email so we can be prepared for the number of people attending.
