INVESTIGATION OF COUNTY SURVEYOR MONUMENT AT 1/4 CORNER 36 T4 & 5N, R16W

The location of this monument with respect to the Witness Corner as shown in Mr. S.G.Chamberlin's Notes (see page 136-C) has created some concern as to whether its present position on the ground is in accordance with the notation, "Set per W.C. found and tied in by S.G.Chamberlin---etc.-- see page 136-C" shown on page 136. The record position of the 1/4 cor per C.S.9234, page 7, is W 80 links (52.80') from the Witness Corner, where-as Chamberlin's notes show the monument 16.00' Wly and 52'Sly of such record position.

The random township line was run by Brackett in December 1927, as shown on pages 135, 136 & 137. A close inspection of page 136 reveals that the 1/4 cor monument was originally set by single proportion between the accepted section corners 1/2 mi. E and 1/2 mi. W at Sta. 27+60.31 and 15.065 S of the random line. This was probably done early in 1928. At some later date the monument was reset to a position at Sta. 27+74.58 and 35.84 N of the random line. The data relative to the original proportional location was crossed out and the, "Set per W.C.--etc.--" was added.

The notes on page 136 are incomplete in that the dates of the setting and resetting of this monument are now shown. The pluses and offsets indicate that the monument was moved 14.27' Ely and 50.91' Nly.

Chamberlin's survey was made in March 1921 and since the C.S. monument did not exist at that time, it is apparent that, although not dated, the data in his notes relative to the monument were added sometime after his original survey. He notes that the monument he tied in was "set for 1/4 corner by prop."

Upon finding this proportional 1/4 cor., Mr. Chamberlin probably brought his evidence of the Witness corner location to the attention of the County Surveyor and Deputh H. I. Stites was no doubt

RETURN TO LOS ANGELES COUNTY SURVEYOR 700 HALL OF RECORDS

FORM 247 5M 5-46

F. B. 314 Pg. 124

furnished with the copy of Chamberlin's notes, now filed as page 136-C, and authorized to move the monument to a location at record distance from the Witness Corner.

The W.C. was not found by Brackett in 1927 and apparently had been destroyed after Chamberlin found it in 1921. The notes on page 136 are vague as to just how its position was reproduced, but the note added by Deputy Stites on Chamberlin's notes (page 136-C) indicated that it was probably relocated from certain points found by Chamberlin in 1921 and found by Stites to be existent at the later date.

The distances (14.27 Ely and 50.90 Nly per pg 136) that the monument was moved from the original proportional location, compare favorably with the distances (16' Wly and 52' Sly, per page 136-C) that Chamberlin measured between the proportional monument and the point 52.80' W from the Witness Corner.

It is, therefore, concluded that the County Surveyor's monument was moved from the position shown in Mr. Chamberlin's notes and that its present location on the ground is at record distance from the position of the Witness Corner found by Chamberlin and that it is correctly shown on page 136 and on C.S. B-132, Sht. 1.

W. M. Holmes
Deputy County Surveyor.
