F.B. 424 Pg 49

Notes Ck'd by D.M. Finley	Survey of Riverside-Redondo Blvd.	F.B.	PG.
Map No. B-442-2	W. O. 920 Tape No. St'd °F.		
Office Work J.N. Rice	Surveyed by		
Checked D.M. Finley	Notes Date		
Date Nov. 1933	Indexed		

REASONS FOR ADJUSTING DISTANCES ALONG
ADOPTED CENTER LINE
EL CAMINO REAL BETWEEN AND INGLEWOOD AVENUE

The neccessity for adjusting some of the distances as shown in F.B. 424 between El Camino Real and the S.E. Cor. of Sec. 30 T.3S.R.14W. is because the Adopted ℄ was staked according to an office calculation which was based on the original chainage made by P.W. Atkins in Apr 1929 per F.B. 312-72-87. These adjustments enable the points set by proportion to be shown in their proper relations.

The points for street ℄s. going north from the Adopted ℄ between the S.E. Cor. of Sec. 30 T.3S. R.14W. and Vail Ave. were set by J.W. Boyer in Nov. 1929 per his chainage shown in F.B. 422-37, 38, 42 and this chainage is adopted to conform with C.S. B-455-4. The points for street ℄s. going south from the Adopted ℄ between Flagler Lane and Slauson Lane were originally set by P.W. Atkins in June 1929 per his chainage shown in F.B. 312-87-91. The distances between these points are calculated to fit Boyer's chainage shown in F.B. 422 and does not quite check the proportioning per the original chainage. The C.S. Map will show these points as replacements of P.W. Atkins original points. The adjustments of some of the distances along the Adopted ℄ as shown in F.B. 424 is due to coördinating the chainage of these two surveys.

For explanation of adjusted distances between Vail Ave. and Inglewood Ave. see F.B. 312-92.

D. M. Finley Nov. 20, 1933.
