Note:- Elev's of B.M.'s #B.G. 1500, B.G. #1501 and B.G. #1502 agreed within the allowable leveling error.
Differences of elevations between these marks and B.G. #2936 and B.G. #2937 were excessive and indicated that movement has occurred at these marks. Adjustment was made using the first three marks listed and the last two marks treated as turning points to complete the loop. The loop closure thus obtained was 0.002' and well within allowable leveling errors.
