Fd evidence of black particals in these areas

Dug trench 12" deep as shown 24" wide

Stone Mound.

Hancock dug pits & raised mound for 1/4 cor. In those cases where Co. Sur. found Hancock originals it was a stone mound. I therefore feel that when Hancock refered to a mound it was stone. As the post was charred I searched for evidence of charcoal in pits and found small particals of black substance in areas shown on 8-12". I could not positively identify these particals as charcoal
