2. Attach a map of your storm drain system showing all permitted connections (if available), and the locations of all illicit connections and discharges that occurred last year (Part 4.G.1.b). This project, if funded, will start late this year. Estimated completion time is unknown at this point due to lack of resources. Currently the city doesn't have a storm system map.

3. Describe your enforcement procedures for eliminating illicit discharges and terminating illicit connections.

Illicit discharges are identified through either citizen complaint or through routine visual inspection of City roads by Public Works or Building Department staff. Upon identification of an illicit discharge, the City investigates the source of the discharge and attempts to trace the source back to the individual property. If possible, staff contacts the property owner or occupant at the time of discovery to eliminate the discharge. Upon identifying the source property, the City identifies the property owner by accessing the GIS database that contains owner information. The City prepares a certified letter to the property owner to cease and desist. If the letter fails to correct the situation, additional enforcement action will be determined in consultation with the City Attorney, City Manager, and City Engineer.

4. Describe your record keeping system to document all illicit connections and discharges.

Staff maintains a copy of the letter in the subject property address file.
