

**CITY OF EL SEGUNDO
ILLICIT CONNECTIONS AND ILLICIT DISCHARGES ELIMINATION PROGRAM**

The storm drain system was last inspected in 2001 by a private contractor to determine if any illicit connections existed. When the City last conducted this process, no illicit connections were found. In addition, staff conducts field inspections during all maintenance activities and is vigilant to reduce/eliminate the chances that illicit discharges might occur. The City plans on smoke testing the storm drain system during fiscal year 2012/2013.

Finally, the City of El Segundo has implemented Order No. 01-192 Special Provisions, Part 4, Section G "Illicit Connections and Illicit Discharges Elimination Program" for the City's program.
