

NOTE: This is a preliminary Special Flood Hazard Area (SFHA) map based on the levee certification analysis conducted for FEMA's 100 year flood. This estimated SFHA has not been approved by FEMA. FEMA will require a detailed analysis of this area and additional analysis of the non-levee segments to determine the full extent of the SFHA for its Flood Insurance Rate Maps. This map is for planning purposes only and Public Works does not assume any liability for its use.
