**Blanket Permit Info:**

John Sanchez  
 P.O. Box 1610  
 El Monte, CA 91734-2010  
 Blanket Permit#: 902

Service cut permits are valid for single day use only, unless specifically authorized by the County. SPATS may not be used when weekend work is requested. SPATS permits expire 30 days from Proposed Start Date (P.S.D). Expired permits will be closed and an inspection will be performed to verify that work was not performed without validation. The permittee will be billed the current rate for service cut inspection. If it is determined that work was performed without validation and the right of way has not been repaired, the County will issue a standard road permit and bill the permit issuance fee, inspection fee and/or actual cost inspection charges until the road right of way is restored to the satisfaction of the County. If work was not performed, the permittee will be responsible for obtaining a new permit.

Prior to starting work, 24 hour notification is required. Notifications received after 12 o'clock noon will be scheduled for the **2nd business day** after the day notification is received. For all validated permits; applicant must inform the inspection office if the work is to be postponed or cancelled. When cancelling work, same day notifications are allowed until 8:30 am. Failure to notify the inspection office will result in additional charges.

All restorations shall be completed within 30 days of permitted work completion. Restoration work shall result in a condition that is equal to or better than pre-existing and shall be completed to the satisfaction of the County. Failure to complete restoration will result in the closure of the SPATS permit and the issuance of a standard road permit and billing of the permit issuance fee, inspection fee and/or actual cost inspection charges until the road right of way is restored to the satisfaction of the County.

Please see BLANKET EXCAVATION PERMIT ATTACHMENT for more information.
