**SECTION II ELEVATION CERTIFICATION** (Certified by a Local Community Permit Official or a Registered Professional Engineer, Architect, or Surveyor)

- **FIRM ZONE A1-A30:** I certify that the building at the property location described above has the lowest floor (including basement) at an elevation of __ feet, NGVD (mean sea level) and the average grade at the building site is at an elevation of __ feet, NGVD.

- **FIRM ZONE V, V1-V30:** I certify that the building at the property location described above has the bottom of the lowest floor beam at an elevation of __ feet, NGVD (mean sea level), and the average grade at the building site is at an elevation of __ feet, NGVD.

**SECTION III FLOODPROOFING CERTIFICATION** (Certification by a Registered Professional Engineer or Architect)

- I certify to the best of my knowledge, information and belief, that the building is designed so that the building is watertight, with walls substantially impermeable to the passage of water and structural components having the capability of resisting hydrostatic and hydrodynamic loads and effects of buoyancy that would be caused by the flood depths, pressures, velocities, impact and uplift forces associated with the base flood.

- **YES ☐ NO ☐** In the event of flooding, will this degree of floodproofing be achieved with human intervention? (Human intervention means that water will enter the building when floods up to the base flood level occur, unless measures are taken prior to the flood to prevent entry of water (e.g., bolting metal shields over doors and windows).

- **YES ☐ NO ☐** Will the building be occupied as a residence?
