7. Indicate the elevation datum system used on the FIRM for Base Flood Elevations (BFE): ☑ NGVD '29 ☐ Other (describe on back)

8. For Zones A or V, where no BFE is provided on the FIRM, and the community has established a BFE for this building site, indicate the community's BFE: 12618.0 feet NGVD (or other firm datum—see Section B, Item 7).

### SECTION C - BUILDING ELEVATION INFORMATION

1. Using the Elevation Certificate below, indicate the diagram number from the diagrams found on Pages 5 and 6 that best describes the subject building's reference level:

2(a). Firm Zones AI-A30, AE, AH, and A (with BFE). The top of the reference level floor from the selected diagram is at an elevation of [ ] feet NGVD (or other firm datum—see Section B, Item 7).

2(b). Firm Zones V1-V30, VE, and V (with BFE). The bottom of the lowest horizontal structural member of the reference level from the selected diagram is at an elevation of [ ] feet NGVD (or other firm datum—see Section B, Item 7).

2(c). Firm Zone A (without BFE). The floor used as the reference level from the selected diagram is [ ] feet above or below [ ] (check one) the highest grade adjacent to the building.

3. Indicate the elevation datum system used in determining the above reference level elevations: ☑ NGVD '29 ☐ Other (describe under Comments on Page 2). (NOTE: If the elevation datum used in measuring the elevations is different than that used on the FIRM [see Section B, Item 7], then convert the elevations to the datum system used on the FIRM and show the conversion under Comments on Page 2.)

4. Elevation reference mark used appears on FIRM: ☑ Yes ☐ No (See Instructions on Page 4)

5. The reference level elevation is based on: ☑ Actual construction ☐ Construction drawings

(NOTE: Use of construction drawings is only valid if the building does not yet have the reference level floor in place, in which case this certificate will only be valid for the building during the course of construction. A post-construction Elevation Certificate will be required once construction is complete.)

6. The elevation of the lowest grade immediately adjacent to the building is: 12618.0 feet NGVD (or other FIRM datum—see Section B, Item 7).

### SECTION D - COMMUNITY INFORMATION

1. If the community official responsible for verifying building elevations specifies that the reference level indicated in Section C, Item 1 is not the "lowest floor" as defined in the community's floodplain management ordinance, the elevation of the building's "lowest floor" as defined by the ordinance is: [ ] feet NGVD (or other FIRM datum—see Section B, Item 7).

2. Date of the start of construction or substantial improvement: 6-14-74
