Before Installation, Please Review the Following Checklist

- Ensure that SolaRack® is compliant with your module manufacturer.
- Ensure compliance with any clearances required by your local fire department of building & safety code.
- Ensure your work complies with national, state and local requirements - Even those that may supersede this manual.
- All installations must be preformed by licensed contractors & electricians that are bonded and insured.
- Only use system components supplied by SolaRack®
- Make sure your roof is in proper condition prior to installation. Do not install on damaged roofs!
- Use only appropriate, recommended tools and wear safety goggles and gloves during installation

Fire Classification UL STD 1703

- Any Roof Slope with Module Types 1 and 2
- Testing preformed at 5” from roof surface (worst case). System can be installed at any height.
- Class A rated PV systems can be installed on Class A, B, and C roofs without affecting the roof fire rating.

Grounding & Bonding UL STD 2703

Components tested and listed as a grounding method are:
- Universal Mid Clamp
- Universal End Clamp
- Splice Kit
- Micro Bolt, Listed to ground Solaredge Optimizers
SolaRack Components

**SolaRack MCR 2.0 Rail**
- Material: Aluminum AL 6000 Series
- Finish: Anodized Clear or Black
- Item Number: IGB-SR-2.0MCR

**SolaRack MCR 2.0 Splice**
- Material: Aluminum AL 6000 Series
- Finish: Clear Anodized / Black Electrophoresis
- Item Number: IGB-SR-SK (B)

**Universal Mid Clamp**
- Material: Aluminum AL 6000 Series
- Finish: Clear Anodized
  - Black Electrophoresis
- Item Number: IGB-SR-MUNI2846S or IGB-SR-MUNI2846B
- Frame Size: 28mm-46mm

**SolaRack ECO Rail**
- Material: Aluminum AL 6000 Series
- Finish: Anodized Clear or Black
- Item Number: SR-ECO

**SolaRack ECO Splice**
- Material: Aluminum AL 6000 Series
- Finish: Clear Anodized / Black Electrophoresis
- Item Number: SR-ECO-SK (B)

**Universal End Clamp**
- Material: Aluminum AL 6000 Series
- Finish: Clear Anodized
  - Black Electrophoresis
- Item Number: IGB-SR-EUNI2846S or IGB-SR-EUNI2846B
- Frame Size: 28mm-46mm

**SolaRack STRD Rail**
- Material: Aluminum AL 6000 Series
- Finish: Anodized Clear or Black
- Item Number: SR-STRD

**SolaRack STRD Splice**
- Material: Aluminum AL 6000 Series
- Finish: Clear Anodized / Black Electrophoresis
- Item Number: SR-STRD-SK (B)

**SolaRack Micro Bolt**
- Material: SUS304
- Finish: Stainless Steel
- Item Number: IGB-SR-MICRO
- Features: UL Listed to ground Solaredge optimizers SE-Pxxx

**SolaRack HD Rail**
- Material: Aluminum AL 6000 Series
- Finish: Anodized Clear or Black
- Item Number: SR-HD

**SolaRack HD Splice**
- Material: Aluminum AL 6000 Series
- Finish: Clear Anodized / Black Electrophoresis
- Item Number: SR-HDSK (B)

**ILSCO Grounding**
- Material: 6061-T6 Aluminum
- Finish: Clear
- Item Number: SGB-4
- Features: UL Listed 467,
  - "For single-use only"
Composition L-Foot Kit
**Material:** Aluminum 6000 Series /1070  
**Finish:** Clear Anodized  
**Black Electrophoresis**  
**Item Number:** IGB-SR-CH  
or IGB-SR-CHB

Double Composition
**Material:** Aluminum 6000 Series /1070  
**Finish:** Clear Anodized  
**Black Electrophoresis**  
**Item Number:** IGB-SR-DCH  
or IGB-SR-DCHB

SolaRack L-Foot
**Material:** Aluminum AL 6000 Series  
**Finish:** Clear Anodized / Black Electrophoresis  
**Item Number:** IGB-SR-LFOOT (B)

Stone Coated Metal
**Material:** Aluminum 6000 Series /1070  
**Finish:** Clear Anodized  
**Item Number:** IGB-SR-SCM

Double Stone Coated Metal
**Material:** Aluminum 6000 Series /1070  
**Finish:** Clear Anodized  
**Item Number:** IGB-SR-DSCM

Adjustable S-Tile Hook
**Material:** SUS304  
**Item Number:** IGB-SR-ADJS

Standoff Kit
**Material:** Aluminum 6000 Series /1070  
**Finish:** Clear Anodized  
**Black Electrophoresis**  
**Item Number:** IGB-SR-SF(***xxx***)  
or IGB-SR-SFB(***xxx***)

Double Standoff Kit
**Material:** Aluminum 6000 Series /1070  
**Finish:** Clear Anodized  
**Black Electrophoresis**  
**Item Number:** IGB-SR-DSF(***xxx***)  
or IGB-SR-DSFB(***xxx***)

Flat Tile Hook
**Material:** SUS304  
**Item Number:** IGB-SR-FTH

Front Tilt Kit
**Material:** Aluminum AL 6000 Series  
**Finish:** Anodized Clear  
**Item Number:** IGB-SR-FT  
Features: Dual Nut Bracket, L-Foot attachment and rail attachment

SolaRack Back Tilt Leg
**Material:** Aluminum 6000 Series  
**Finish:** Clear Anodized  
**Item Number:** IGB-SR-xxx  
Features: Available in 3 different sizes 10°-15°,15°-30° & 30°-45°

Universal Rail Cap
**Material:** UV-Rated PVC  
**Finish:** Black

Wire Management
**Material:** UV Rated PVC  
**Finish:** Black

Markings

All SolaRack MCR 2.0 Rails are marked by the following label:

SOLARACK® PV MOUNTING & BONDING DEVICE
PROTECTED BY U.S.PATENTS
DESIGNED IN CALIFORNIA MANUFACTURED IN CHINA
See Installation Manual for Installation Requirements to
Achieve Specified Fire Class Rating, System Fire Classification
A Type 1 & 2 Low and Steep Slopes.
See Installation Manual for Design Loads, Span Charts and
Grounding Instructions.
ITEM CODE: IGB-SR-MCR2.xxx | Production Date: xx/xx

UL 2703
Stamped on SolaRack® Micro attachment bolt channel nut.
Item # IGB-SR-MICRO

UL 2703
Stamped on SolaRack® Mid & End Clamps Channel nut.
Item # IGB-SR-MUNI2846 / EUNI2846

Stamped on ILSCO SGB-4 Grounding Lug
Recommended Placement & Spacing of Roof Attachments

**IMPORTANT:**
Flashing should not overhang a downslope shingle or a gap in shingle material.

The SolaRack® Composition L-Foot Kit is optimally spaced based on local city code and the rail system used. For measurements related to clearances and roof setbacks, please refer to your local building and safety office or other authorities having jurisdiction. When using the Composition L-Foot Kit with SolaRack® MCR 2.0 Rails, attachments may be spaced up to 72”. For proper installation, please refer to the detailed installation guide on page 9. Lag screw must be installed in the center of a roof rafter and sealant must be applied under the flashing during installation. Installation must be preformed by licensed professionals to avoid roof damage. Removing stone gravels and deforming shingles in any way during installation can and will shorten the lifespan of the roofing. Be sure not to install systems on poor quality or damaged surfaces.

**Mounting Instructions: Portrait**

Please follow this instruction graphic when solar modules are mounted in portrait alignment. Rail must be mounted 8”-18” from the top and bottom edge of the solar module.

Some solar module manufacturers may have specific requirements rail placement that differs from these instructions, please check with your module manufacture for compliance regarding mounting requirements.

Rail must not exceed 16” cantilever past the last attachment.

**Mounting Instructions: Landscape**

Please follow this instruction graphic when solar modules are mounted in landscape alignment. Rail must be mounted 4”-7” from the top and bottom edge of the solar module.

Some solar module manufacturers may have specific requirements rail placement that differs from these instructions, please check with your module manufacture for compliance regarding mounting requirements.

Rail must not exceed 16” cantilever past the last attachment.

UL Requirement & Guidelines

Please read carefully and follow the following guidelines and standards set by UL to comply with the ETL certification issued. SolaRack® is certified by ETL for the following listing: UL STD 1703 Fire Rating & UL STD 2703 Grounding and Bonding. The components evaluated for grounding and bonding that has passed received the UL STD 2703 by ETL are as follow:

- SolaRack® Integrated Grounding & Bonding Series IGB-SR-MUNI2846 Universal Mid Clamp both in clear anodized and black electrophoresis.
- SolaRack® Integrated Grounding & Bonding Series IGB-SR-EUNI2846 Universal End Clamp both in clear anodized and black electrophoresis.
- SolaRack® Integrated Grounding & Bonding Series IGB-SR-SK Splice Kit both in clear anodized and black electrophoresis.

CONFORMS TO UL STD 1703

SolaRack® racking systems have been tested and listed by ETL for system fire classification Class A type 1 & 2. Testing was preformed and passed at 5” above the roof, allowing installation without limitation of distance between the roof and solar modules. System assembly to be mounted over a fire resistant roof covering rated for application. Re-inspect the installation for loose components, loose fasteners and any corrosion. If found, the affected components are to be replaced immediately.

CONFORMS TO UL STD 2703

SolaRack® system components were evaluated assuming a 20 Amp maximum series fuse size. SolaRack® mid & end clamps bond and ground the system by penetrating the anodized surface of the solar module with our stainless steel pointed pins. (Fig 1,2) The system is grounded to the rails by stainless steel channel nut. At the end of every array, an LSCO SGB-4 ground lug must be used for grounding (Fig 3), LSCO SGB-4 acceptable wire size is 4-14 SOL-STR and is suitable for use with either copper or aluminum wire. The size of grounding wire will be determined by electrical code. The SolaRack® splice kit was tested as a grounding & bonding method and is also listed under UL 2703 (Fig 4). SolaRack® does not require jumpers! Periodic inspection is required. Re-inspect installation for loose components, loose fasteners and any corrosion, such that if found the affected components are to be replaced immediately.

Important

- All bare copper must be separated from any aluminum surface.
- Check with your local AHJ regarding roof setbacks or any special requirements.
- Some jurisdiction’s require visible labels to easily identify UL listed systems.
Universal End Clamp

- M6 SUS304 Screw
- Top Portion Aluminum End Clamp
- Bottom Portion Aluminum End Clamp
- Channel Nut with 6 Grounding Pins
- 2 x SUS304 Grounding Pins
- Module Supporting Lip

Universal Mid Clamp

- M6 SUS304 Screw
- M6 SUS Lock Washer
- M6 SUS Star Washer
- 4 x SUS304 Grounding Pins
- Stainless Steel Spring
- PVC Spring Support Base
- Channel Nut with Grounding Points

Detail Sectional Drawing

- Module Clamp
- SolaRack® MRC 2.0 Rail
- SolaRack® L-Foot
- UV Rated Silicon
- SUS 304 T-Bolt
- Asphalt Shingles Roofing
- Roof Rafter
- 5/16" x 3" SUS 304 Lag Screw
Design Code References
The following engineering references were considered in determining the values of the wing load conditions and material properties of the aluminum railing.
- IBC 2015 / CALIFORNIA BUILDING CODE 2016
- ASCE 7-10( wind loading)
- Aluminum Design: Aluminum Design Manual 2010

Design Load Rating in Accordance with UL 2703
Downward Pressure - 10 psf
Upward Pressure - 5 psf
Down-slope Load - 5 psf

Worst Case Loading
Worst case loading conditions were based on the following two load combinations per section 2.4 of ASCE 7-10:
1) 0.6D + 0.6W
2) D + 0.75L + 4W + 0.75S (L=0)

Span Charts
For span charts please refer to solarack’s MCR2.0 state letters

Design Criteria
The following parameters were considered in determining the values of the allowable span charts of the railing.
- Maximum Building Height Considered = 30ft
- Exposure Categories Considered: B & C
- Wind Pressure Based on Section 30.4 (C&C Method 1)
- Gust Factor, G = 0.85
- Topography Factor, Kzt = 1.0
- Directionality Factor, KD = 0.85
- Importance Factor, I = 1.0
- Zone 2 Pressures Only Considered
- Minimum 2 Rails Per Panel
- Maximum Cantilever of Railing from Anchor 12 Inches
- Tilt Angles Considered: 0 to 30 degrees
- Performance Not Limited to Deflection
- Adequacy of Attachments Based on Evaluation Report

This photovoltaic system is to be installed in accordance with the National Electrical Code, ANSI/NFPA70
SolaRack® Flashing Water Deflector

- **1.** 12” x 9” Aluminum Flashing AL1070
- **2.** UV Rated Silicon Washer
- **3.** Completely Anodized Aluminum L-Foot AL 6000 Series
- **4.** Water Deflector
- **5.** 5/16” x 3” SUS Lag Screw
- **6.** SUS304 T-Bolt and Nut.
Tools Required

- Cordless Drill (non-impact)
- Impact Driver (for lag screw)
- Torque Wrench (0-250 in-lbs)
- M6 Allen Head
- 13mm Socket (for lag screw)
- 15mm Socket (for T-Bolts)
- 11mm Socket (for SGB-4)

Torque Values

- Composition L-Foot Kit Lag Screw (13mm Socket): Fully seat
- T-Bolt to Rail (15mm Socket): 18.5 ft lb
- ILSCO SGB-4 Ground Lag (11mm Socket): 35 in-lbs
- Splice Kit (M5 Allen Head): 10ft lb
- Universal Mid Clamp (M5 Allen Head): 16 ft lb
- Universal End Clamp (M5 Allen Head): 14 ft lb
- Micro Attachment Kit (M5 Allen Head): 20 ft lb

Step by Step Installation Guide for Single Composition

The SolaRack Composition L-Foot kit is designed to be installed on asphalt or composite shingles roofs. This system has been listed by ETL and conforms to UL STD 2703 for Grounding & Bonding & UL STD 1703 Class A Type 1&2. Installation of the SolaRack® Composition L-Foot kit doesn’t require any modification to existing roofing materials and will provide a watertight seal when installed according to the following installation guide. Please follow the steps below to achieve a complete seal and proper installation. The product warranty will be VOIDED if installed differently then specified in this manual or if any alterations or modifications are made to the product. Roof must be in good condition prior to installation.(condition of roof is to be verified and determined by the contractor / installer and SolaRack doesn’t take any responsibility of determining the quality of the roof prior installation).

Step 1

Mark the location of your roof penetrations at the rafter locations as outlined in your plans and engineering documents.

Use a crow or nail bar to lift the roofing material where flashing is installed, make sure to remove or loosen any nails in the way.

Drill one 1/4” Pilot hole at the center of the roof rafter. * Check local jurisdiction regarding minimum embedment.

Backfill the pilot hole with sealant.

+ Roof Penetrations
; Roof Rafter

[Diagram of roof penetrations and rafter locations]
Step 2
Insert SolaRack Flashing (1) under the shingles as far as possible. Flashing shall not overhang a down slope shingles or a gap in shingle material. Place the V water deflection below the next shingle DO NOT cover it.

Place the L-foot (2) and the Silicon Washer (3) over the flashing (1) and align the L-Foot(2) hole with the flashing (1)hole.

Step 3
Drive a 5/16" x 3" Lag Bolt (4) to connect the L-Foot (2) and the flashing (1) to the roof until fully seated.
Step 4
Insert SolaRack® T-Bolt (☉) through the L-Foot (∇) opening into the rail opening. Torque 18.5 ft lb

Step 5
Insert SolaRack® Integrated Grounding Splice Kit at the rail opening. Splice bar must be installed 50% set in each rail segment.

Use the Integrated Grounding & Bonding splice kit at all connections between two rails. Maximum distance from L-Foot is no more then 36” from each side of the Splice Kit Torque to 10 ft lb.
Step 6
Insert SolaRack Integrated Grounding & Bonding Universal Mid Clamp by lifting the Plastic Support Base with two fingers and tilting the Chanel nut into the rails upper opening. Release the Plastic Support Base and the Mid Clamp will stay in the open position.

Step 7
Fasten and install at locations where two solar modules meet. Location of mid clamps from rail end should comply with module manufacture guidelines. Torque to 16 ft lb. Once Mid Clamps are fasten the Stainless Steel Pins will penetrate the anodization coating on the module frame for bonding (red circles below show grounding points).
Step 8
Insert SolaRack Integrated Grounding & Bonding Universal End Clamp by sliding it into the rail upper opening. Make sure the lip at the front of the End Clamp is placed below the Module frame.

Step 9
Fasten and install at the end of each array Minimum 2 End Clamps per Module. Location of End clamps should comply with module manufacture guidelines. Torque to 14 ft lb. Once End Clamps are fasten the Stainless Steel Pins will penetrate the anodization coating on the module frame for bonding.
Step 10
Install ILSCO SGB-4 Grounding Lug at the end of a rail (please refer to Grounding Diagram on page 6). Run copper wire to connect all grounding lugs. Copper wire must not touch any aluminum surface. Tighten each bolt to 35 in-lbs as recommended by ILSCO. Acceptable wire size is 4-14SOL-STR. Suitable for use with either copper or aluminum. Size of grounding wire will be determined by electrical code.

Installing Micro Inverters / Optimizers

Step 1
Insert the Micro Bolt Attachment by tilting it into the upper opening of the rail.
Step 2

Slide The Micro Inverter / Optimizer into place, make sure the washer is on top of the Micro Inverter / Optimizer Plate.

X - Micro Attachment

Step 3

Tighten the Micro Bolt to secure the Micro Inverter / Optimizer in place, Torque to 20 ft lb.

X - Micro Attachment
SolaRack Limited Product Warranty

This warranty is for SolaRack “products” manufactured after June of 2018, SolaRack ® provides the following warranties, for the products installed according to our installation manual on the proper roofing structure that the product was designed for: SolaRack Inc. (“SolaRack”), warrants to the buyer (Buyer”) at the original installation site, (“product”) shall be free from defects in material and workmanship which substantially impair their ability to preform their intended function, for a period of Twenty five (25) years, except for anodized finish (“Finish Warranty”), which finish shall be free from visible peeling, cracking or chalking under normal atmospheric conditions for a period of five (5) years, from the 1) The date the installation of the product at the site is substantially completed, or 2) 60 days after the initial purchase of the products from SolaRack.

This warranty does not cover the following:

1) Any defect that has not been reported to SolaRack in writing within the warranty periods set above and or within 60 days after discovery of such defect.
2) PV modules, electrical components and or wiring used in conjunction with the product or any other materials not provided by solarack.
3) Goods that are sold by SolaRack, which are not designed or manufactured by SolaRack.
4) Damage to the product that occurs during its shipment, storage, installation or majeure acts including fire, flood, earthquake, storm, hurricane or other natural disaster, war, terrorist activities, acts of foreign enemies and criminal acts.
5) Normal wear, or damage, resulting from misuse, overloading, improper installation.
6) Installation of the product is not preformed according with SolaRack® written installation manual (guide), or if the product has been modified, repaired, painted or reworked in a manner not previously authorized by SolaRack in writing, or if the product is consequential, contingent or incidental damages arising out of the use of the product by any circumstances.

The “Finish Warranty” does not apply to surface oxidation or any foreign residue deposited on the finish, or to all installation in corrosive atmospheric conditions (at SolaRack® sole discretion). The “Finish Warranty” is VOID if the practices specified by AAMA 609 & 610-02 “Cleaning and Maintenance for Architecturally Finished Aluminum”, or ASTM A780/A780M-09 “Standard Practice for Repair of Damaged and Uncoated Areas of Hot-Dip Galvanized Coating” as applicable, are not followed.

If within the specified Warranty periods the “Products” shall be reasonably proved to be defective, then SolaRack shall correct the defect by repair, replacement, or credit at SolaRack’s sole discretion. Refurbished products may be used to repair or replace the defective components. Transportation, installation, or any other costs associated with product repayment are not covered by these warranties and are not reimbursable. Such repair or replacement shall completely satisfy and discharge all of SolaRack’s liability in respect to these warranties.

A formal document providing the purchase location, installation address and purchase date of the “Product” is required with any warranty claim.

Transfer of Warranty
This “Limited Warranty” is transferable with respect to products purchased and manufactured by SolaRack to a new owner of the entire photovoltaic system, in which SolaRack products are originally installed, provided that such product remains intact in its original place of installation. Any subsequent owner must agree in writing to be bound by the terms of this SolaRack Limited Warranty document. Change in ownership of the Products or assignment of this Limited Warranty will not cause the warranty periods above to reset.

Except as set forth above, SolaRack® sell products on “AS IS” basis, which may not be free of errors or defects, AND ALL EXPRESS OR IMPLIED REPRESENTATION AND WARRANTIES, INCLUDING WARRANTIES OF MERCHANTABILITY, FITNESS FOR PARTICULAR PURPOSE, QUALITY, WORKMANSHIP, EFFORT, CORRESPONDENCE TO DESCRIPTION, DESIGN, TITLE OR NON- INFRINGEMENT, OR ARISING FROM COURSE OF DEALING, COURSE OF PERFORMANCE OR TRADE PRACTICE, ARE HEREBY DISCLAIMED.
