Description of Nature, Purpose, and Beneficiaries of Project

On September 13, 2022, the Board of Supervisors moved to adopt the plans and specifications that are on file with Public Works for the project and found that the items specified as sole source items in the plans and specifications are the only such items available to match other products in use at Central Juvenile Hall and other Probation Department facilities and may be designated by specific brand name in accordance with State Public Contract Code Section 3400.

The scope of work for the proposed Closed-Circuit Television (CCTV) Project includes the installation of a security system with new CCTV cameras and network infrastructure, including a fiber-optic backbone and fiber patch panels to connect the equipment and servers, monitoring stations, video and audio management systems, software applications, and video and audio storage systems. Additionally, the CCTV Project also includes installation of new cooling systems in the archiver rooms, which will help mitigate the added heat loads generated by the data recording and storage equipment. Improvements to the electrical infrastructure includes new transformer and new sub panel in the primary archiver room and new circuit breakers in existing electrical panels serving two archiver rooms. To facilitate future Wi-Fi access, identified data distribution infrastructure in specific exterior locations will also be installed within the scope of work of this project.
