X Categorical Exemption State type and section number: The proposed project involves minor grading and hydroseeding to repair the damaged top layer of the landfill cover and is categorically exempt from CEQA. The project is within certain classes of projects that have been determined not to have a significant effect on the environment in that it meets the criteria set forth in Section 15304 (a) and (f) of the State CEQA Guidelines and Classes 1 (j) and (p); and 4 (a) and (k) of the County's Environmental Document Reporting Procedures and Guidelines, Appendix G.

This project is also statutorily exempt under Section 21080 (b) (4) and State CEQA Guidelines Section 15269 (a), which apply to specific actions to prevent or mitigate an emergency, because the current erosion, unless mitigated will allow moisture to penetrate through the waste layer and contaminate the soil beneath. The project consists of repairs of an existing facility with negligible or no expansion of use, maintenance, and repair beyond that previously existing.

Reasons Why the Project is Exempt:

The project provides for repairs at existing site involving negligible or no expansion of an existing use. In addition, there are no cumulative impacts, unusual circumstances, potential for substantial adverse change in the significance of a historical resource, damage to scenic resources or listing on hazardous waste site lists compiled pursuant Section 65962.5 of the Government Code or indications that it may cause a substantial adverse change in the significance of a historical resource other limiting factors that would make the exemption inapplicable to the Pitchess Detention Center Class III Landfill Closure Repairs Project based on the records of the proposed project.
