E-waste Collection

WASTE REDUCTION & RECYCLING
Project Guide
Waste Reduction & Recycling

Generation Earth Program

Generation Earth is a Los Angeles County Department of Public Works environmental education program presented by TreePeople. Our goal is to educate and empower teens in Los Angeles County to be an active part of the solution to environmental concerns in their community. We offer do-it-yourself environmental projects that help youth make a positive difference at school, at home, and out in the world. Our programs are built to support the needs of teachers, students, schools and community youth groups.

Generation Earth Project Guides

Generation Earth Project Guides are designed to assist students in the completion of an environmental project. These Guides provide the instructions, tools and support materials needed to learn about the subject, and take the steps to completion of a project that positively impacts the community.

Waste in Los Angeles

Waste is a vital issue in Los Angeles County. Every day, each person disposes of approximately 5.0 pounds of trash. Together, the 10 million residents, businesses and manufacturers in L.A. County send 9.36 million tons of trash to the landfill every year. We generate enough trash to fill the Rose Bowl in just 4 days! These resources are generally transported to one of 10 solid waste landfills around Los Angeles County. What does that mean for you? It costs money to dispose of all this waste, valuable open space is used to create landfills to store the waste, and waste pollutes the environment.

Electronic Waste

Electronic waste (E-waste) consists of electronic devices such as televisions, computers, cell phones, and microwaves that have come to the end of their useful life, are broken, deemed obsolete by the user or are simply discarded. E-waste is highly toxic to humans, plants, animals and has been known to contaminate water, air and soil. Proper disposal of E-waste includes keeping it out of landfills and responsible E-waste recycling. Schools can play a major part in creating awareness of proper disposal and by hosting E-waste collection events.

E-waste Collection Project Guide

This Guide will help your group promote the proper disposal of E-waste and in the process, keep it from the landfill by hosting an E-waste collection event.
How An E-Waste Collection Works

- A school team arranges a collection date and location with a licensed E-waste collector at least 30 days before the event.

- Members of the local community and school are invited to bring their electronic waste to donate on the day of the collection event.

- Items can include computers, laptops, printers, MP3 players, cell phones, stereos, scanners, video game consoles, DVD players, televisions and more.

- Volunteers receive the donations and load them onto pallets and trucks provided by the E-waste collector.

- At the end of the event, the E-waste collector takes away the donations for responsible recycling.

- If enough donations were brought, the E-waste collector pays the school according to a predetermined pay-scale.

The Steps

1. Did You Know?
This topic sheet provides information about E-waste including what it is, related laws, and how it is managed.

2. Preparation Checklist & Timeline
A checklist is provided for planning and completing first steps. The timeline provides the tasks needed to complete and when.

3. Promotion Plan
Guidelines are provided to ensure promotion of the event in the community.

7. Evaluation
Complete the project by answering questions that serve to evaluate the process and offer next steps for potentially taking on additional waste reducing projects.

8. Resources
Some resources are provided for curriculum and E-waste collectors.
DID YOU KNOW?

Hundreds of different materials are used to make electronics and their components. This includes toxic materials that pose risks to human health and the environment if mismanaged and disposed of improperly.

What materials might be toxic?

Some examples include, CFL bulbs which contain mercury. The glass used in computer monitors contains about 6.5 pounds of lead, as well as mercury, cadmium and other poisonous metals.⁴

Only 12.5% of electronic waste (E-waste) is currently recycled. It is the fastest growing municipal waste stream in America.³

What are the laws in California related to E-waste?

In California, it is illegal to throw many types of electronic waste into the garbage. The Electronic Waste Recycling Act was signed into law on September 24, 2003, and amended in 2004. It established a new program for consumers to return, recycle, and ensure the safe disposal of video display devices, such as televisions and computer monitors. As a result, consumers pay a fee that is included in the cost of new devices and used to pay qualified E-waste collectors and recyclers to manage E-waste.⁴

How is E-waste managed?

Unfortunately, much of the E-waste ends up in landfills. This is an issue because toxic chemicals found in E-waste often leach into the ground or may be released into the air, impacting the environment and local communities. In some cases, old electronics are reused, whether they are re-certified and resold or sent to developing countries for reuse, such as India and China, where E-waste scrap yards take care of the electronic waste. Only a small percentage of E-waste is actually recycled, but while recycling helps ensure that raw materials are reused, it still poses a threat to the local community and environment.

Almost all of the materials used to manufacture a cell phone can be recovered to make new products. Metals, plastics, and rechargeable batteries from recycled cell phones are turned into new materials and products.

What are ways that different parts of a cell phone can be used?

The metals in cell phones – gold, silver, platinum, palladium, copper, tin, and zinc – can be recycled and used by different industries such as jewelry, plating, electronics, and automotive. The plastics can be recycled into plastic components for new electronic devices or other plastic products such as garden furniture, license plate frames, and replacement automotive parts. The battery can be recycled into other rechargeable battery products.⁵

Other solutions exist to reduce the amount of E-waste that poses risks to human health and the environment.

What are other ways to help reduce E-waste and its improper disposal?

Support companies that make eco-friendly products, and those that taking responsibility for the full life cycle of their electronics by taking back their products for re-use. Host an E-waste recycling event to educate and invite the community to participate in proper disposal.
PREPARATION CHECKLIST & TIMELINE

There are many tasks to take to ensure a quality event. Use the resources provided to get organized, set a date, and plan the event!

**Preparation Checklist**
- Use the E-waste Collection Preparation Checklist on pages 6 - 7 to plan and complete the first steps.
- Work as a team to assign who will be responsible for completing these tasks.

**Timeline**
- It takes 1 - 2 months to plan and produce an E-waste collection.
- Once a date is set, use the Timeline on pages 8 - 9 to complete the necessary tasks needed to ensure a successful event.
E-waste Collection Preparation Checklist

☐ Choose a Location

• Identify a large drivable area where cars can drive in and easily drop off items in a drive through style.
• Vacant school parking lots or student pick-up/drop-off curbs are perfect.

☐ Choose a Date

• Typical collection events take place on Saturdays from 9am - 3pm.
• Any month during the school year will work but keep in mind weather concerns such as rainy or extreme heat days.
• If held on campus, check with school administration to ensure the date is available and can be reserved.
• Avoid local holidays or religious observances to allow for more people to participate.
• Note that E-waste disposal increases after the holidays in January and February, and most E-waste collection organizations are booked for April and May events months in advance.

☐ Get Permission

• Choose a team to compile the information about the event and present.
• If holding on campus, make sure you have permission from the Principal and Plant Manager. Clarify whether or not E-waste from your school site can be included in the drop off (any electronic waste on campus is the property of the school district and most schools have signed contracts with waste haulers).
• If holding off campus, make sure the location point-person gives permission to use the parking lot, restrooms, garbage and recycling bins and dumpsters, and can help you promote the event.
Identify an E-waste Collector

- Ask Generation Earth for a list of reliable E-waste collectors.
- Only partner with E-waste collectors that are currently accredited through the State of California.
- Verify the E-waste collector recycles 100% of E-waste collected and no E-waste from your event will be shipped overseas.
- Confirm that the selected E-waste collector has the date available for your event.
- Ask if E-waste collector provides a crew to carry and handle all of the E-waste and haul it away. Students are not allowed to lift any E-waste or transfer it from cars to palettes.
- Ask for the price breakdown of donations and payment. Once dropped off, any E-waste becomes the property of the E-waste collector. Typical pay rates vary by year, the E-waste collector you choose, and the type of E-waste collected. Some E-waste collectors require a minimum weight of E-waste collected before payment is available.
- Find out if your E-waste collector will give you money for cell phones. If not, pull the cell phones at the event and recycle them with Planet Green (www.planetgreenrecycle.com). On average you can make about $25 for a full box of cell phones (and ink cartridges!).
- Make sure that the E-waste collector you choose can provide a certificate of liability insurance document in case your school district requires one for the day of the event.
- Ask if they assist in outreach efforts by providing banners and helping with press releases.

Secure Materials

- Create posters, banners, and flyers to promote the event.
- Make signs to direct people with donations when they are nearby and on the campus.
- Bring sunscreen, drinks and snacks for volunteers on the collection day.
- At least one table or several clipboards and pens for information sheets.

Get Volunteers

- At least 10 to 15 students or volunteers are needed.
- Plan for more, to ensure coverage if someone drops out or can’t make it.
E-waste Collection Event Timeline

It usually takes 1 to 2 months to plan and produce an E-waste collection event. Once the date is set, work backwards and assign tasks and due dates.

1- 2 Months Before the Event

- Identify and secure a location for the event.
  - Evaluate the desired site and ensure it is suitable.
- Find an E-waste collector to collect the E-waste.
- Present the event plan to key stakeholders to obtain permission.
  - Investigate the need for volunteer safety waivers.
- Create a promotion plan (see pages 11 - 14).
- Assign tasks to promotional team members.
- Create social media plan. Consider what websites or event pages to post on.
- Create signs and secure banners.
- Create paper flyers for distribution.
- Write an advertisement or press release and get permission to send out.
- Launch promotion plan.

1 Month Before the Event

- Recruit volunteers for the event.
- Solicit clubs or local nonprofits and invite them to have an outreach booth at the event.
- Display signs and banners.
- Create a map of the site and plan your set-up to create optimal flow of traffic.
- Distribute and collect any necessary volunteer waivers and photo release forms.
1 Week Before the Event

- Coordinate with the location staff about entry time, getting keys for use of the restrooms, etc.
- Secure all supplies (see below).
- Create signs to direct cars.
- Continue promotion.
- Ensure all necessary volunteer forms are received.
- Assign shifts and responsibilities to volunteers.
  - Consider creating two hour shifts from 9am - 11am, 11am - 1pm and 1pm - 3pm with at least three students, and one or two adults per shift.

Event Day!

- Place directional signs.
- Count how many participants come to the E-waste collection. This can be achieved with a sign-in sheet, or assign a greeter volunteer to count the number of attendees when entering.
- Take photos and/or video.
- Assist in getting information sheets that need to be filled out by each individual who drops off E-waste completed as well as thanking people for participating.

Create A Green Event

An E-waste collection event can be a great platform to invite others to share what they do by providing outreach tables.

- Invite local nonprofits to share their materials.
- Invite other campus clubs to pass out information.
- Highlight or advertise other sustainability projects happening on campus.

Supplies

- 1 or more tables
- Sign-in sheet
- Wires, clips, pins, or tape to hang signs
- Blank or printed paper to make directional signs
- Colored markers to make directional signs
- Sunscreen
- Pens
- First aid kit
- Snacks and drinks for volunteers
After the Event

- Take down any signs, banners and flyers after your event. Return banners to your partnering E-waste collector.
- Take any leftover snacks or unopened drinks home or donate to a local food shelter.
- Collect any items that were brought such as pens, tape and signs.
- Thank the volunteers, E-waste collector, and the location staff for helping, and ask if there is anything else they need from you
- Write email thank you notes to anyone who supported your outreach efforts.
- Within 2-4 weeks, your E-waste collector should give you a report that lists the items collected in pounds as well as a check for items collected. Make sure to tell your E-waste collector who the check should be addressed to, so that you have access to the funds. Account access varies from school to school, so check with your Principal for more information.
- Hold an informal event debriefing. Ask what went well and what you would change for the next time. See page 15 for evaluation.
- Report diversion numbers to the school and selected community leaders. Promote the results and photos.
PROMOTION PLAN

Create a promotion plan for reaching the largest audience possible. **The success of the event is directly tied to how much advertising and outreach is done.** Expect a 10% participation rate for all outreach efforts. For example, for every 100 people who know about the event, expect 10 people to show up and drop off E-waste.

Assign tasks and deadlines for the promotional campaign. Consider the following:

**Who is your promotion team?**
- Designer for the flyer.
- Copy writer for the flyer.
- Advertisement/press release writer.
- Social media post and account manager.
- Flyer distributors.
- Phone/email outreach?

**Who do you want to reach in the community?**
- Who is your audience?
- Will some materials need to be in another language?

**What do you want to communicate?**
- The reasons for the E-waste collection.
- Date, time and location (is a map needed?)
- Free for all participants.
- Items accepted.
- Any additional activities happening such as drives, etc.
- Phone number or email for more information.

**How do you want to communicate?**
- Create and send ads.
  - School PTA newsletter.
  - Local newspapers/newsletters.
  - Radio stations.
  - Neighborhood/City Councils.
  - Churches/Places of Worship.

---

**Newsletter & Community Event Calendars**

Find out:
- Who is in charge of the calendar listings for the newsletter.
- The format and deadline for the calendar listing.
- How they prefer to receive the information (fax, email, post directly on their website).
- If they can publish an article.
- The length, format and deadline for the article.
- Who from your team will write the article, and who needs to approve it.
– Partners with the school or event space.
– Ask the local utility company to put a flyer or announcement in the monthly bills that go out to residents.
– Try to connect with your community television channel to announce the event or to run a public service announcement.
– Generation Earth.

• Create and distribute flyers.
  – Place flyers in and around the school community at libraries, chamber of commerce, recreation centers, senior centers, privately owned markets, the mall, or any local business that supports the school.
  – Send flyers home with each student at feeder schools in the school district.
  – Ask student volunteers to take home flyers to give to neighbors. Offer incentives such as extra credit or prizes.
  – See sample flyer on page 13.

• Social media.
  – Online blogs.
  – Facebook Event.
  – Neighborhood websites.
  – Tweets.
  – Instagram.
  – Community event calendars.

• Face to Face.
  – Ask school administration for help in getting the word out.
  – Make lunchtime or classroom announcements.
  – Attend a city council meeting and make an announcement about the event during public comments. These are usually done at the beginning or end of meetings. Some city council meetings are broadcast on local television or the internet.

• Signs and banners.
  – Get banners or signs from the partnering E-waste collector and hang them outside the school or on busy cross streets where a large majority of the community will see it.
  – Make signs and hang them on campus.

Flyers

• Create flyers that are appealing to your audience.
• Present information in a way that it is easily understandable.
• Information should be as concise as possible, and include the important details (why, when, where, what, who).
• Include appropriate graphics and/or photos.
• See sample flyer.
Alverno High School
FREE E-WASTE COLLECTION EVENT

Saturday, May 28, 2016
8:30 a.m. to 1:00 p.m.

Alverno High School will be hosting a free e-waste collection event on campus on Saturday, May 28 along with the LA Conservation Corps. Please bring any of the items listed below to contribute to this drive! It’s a great way to get rid of your e-waste and help Alverno at the same time!

**Materials Accepted:**
Computers and monitors, all types of cellphones, MP3 players and GPS systems, LCD monitors and televisions, and CRT televisions and monitors.

**Materials Not Accepted:**
We cannot accept household appliances including refrigerators, washer/dryers, microwaves, stoves, ovens, or batteries.

**What’s Accepted?**
- Computers and Monitors
- All Cellphones
- LCD Monitors and Televisions
- MP3 Players and GPS Systems
- CRT Televisions and Monitors
Sample Press Release

Imagine Green for the Community of Burbank

Electronic Waste can be properly disposed of in the eyes of 7th graders at Luther Burbank Middle School. Luther Burbank Middle School’s Imagine Green Eco Club and eWaste Center team up to do their part.

Burbank, CA, Saturday, January 30, 2016. Luther Burbank Middle School’s Imagine Green Eco Club and eWaste Center Inc. will be holding an E-waste collection and recycling event at Luther Burbank Middle School, (address here) from 9am to 3pm. Consumers can help prevent toxic chemicals and hazardous materials from entering our landfills by bringing in their old televisions and outdated computers to have them properly disposed of.

The refuse from discarded electronic products, also known as E-waste, often ends up in landfills or incinerators instead of being recycled. Improper disposal of these outdated products also leads to the exportation to third world countries where strict environmental and labor laws are not present. And that means toxic chemicals like lead, cadmium, and mercury that are commonly used in these products can contaminate the land, air, and water. Luther Burbank Middle School’s Imagine Green Eco Club and eWaste Center is dedicated to disposing of these products in a safe and ethical manner, downstream due diligence.

Imagine Green Eco Club is made of Luther Burbank Middle School students who volunteer their time to green their campus and surrounding community.

LA Conservation Corps provide at-risk young adults and school-aged youth with opportunities for success through job skills training, education and work experience with an emphasis on conservation and service projects that benefit the community.

For more information regarding this event, please contact Karla Ramos at LA Conservation Corps at (XXX) XXX-XXXX or Imagine Green Eco Club advisor James Wise at (XXX) XXX-XXXX.

###
EVALUATION

Once the E-waste collection event is complete, answer the following questions to evaluate the event and introduce some possible next steps.

QUESTIONS

1. What were the most successful parts of the project?

2. What were the least successful?

3. What might we do differently next time?

4. Was the audience interested in possibly having another E-waste collection event in the future?

5. How much material was donated? How many participants came?

What’s Next?

Another Project Toolkit
Are you interested in another project toolkit? Consider:
- Textile Recycling Event
- Community Swap
- Food Rescue Projects

Battle of the Schools
Consider competing in the Generation Earth Battle of the Schools competition.
- Talk to Generation Earth for more information.

Share!

Generation Earth would love photos and/or videos of the project!
- Send them to your Generation Earth Facilitator.
RESOURCES

CURRICULUM IDEAS

- Invite a representative from Generation Earth or your partner E-waste company to speak to your group and/or faculty.
  - Make sure everyone knows what E-waste is, and how to dispose of it properly.

E-WASTE COLLECTORS

- Planet Green Recycle, for small electronics and small ink cartridge ongoing recycling collections: https://planetgreenrecycle.com/fundraising/
- Green Box Electronics Recycler, host a permanent E-waste collection bin on your campus: http://greenboxrecycling.com/ (855) 329-2535
- CFL Bulb Recycling information: https://dpw.lacounty.gov/epd/hhw/uwaste_disposal_CFLs.cfm
