

Why recycle?

- It conserves natural resources.
- It protects the environment.
- It conserves landfill space.
- It *saves you money* by reducing the amount you throw into the garbage dumpster, which we charge you for.

The following are examples of **construction and demolition material** that can be recycled:

- Concrete and asphalt
- Bricks
- Gypsum/wall wood
- Plate glass
- Scrap metal.

AUTHORIZED WASTE HAULER

reduce waste and increase recycling

The law states:

To conserve diminishing landfill space and natural resources, California adopted Assembly Bill 341, which sets a Statewide recycling goal of 75% and mandates recycling in the commercial sector effective July 1, 2012.

Also, the County's Construction and Demolition Debris Recycling and Reuse Ordinance requires projects in the unincorporated areas which require a permit to recycle or reuse at least 50% of the debris generated, depending on whether it is a residential or non-residential project. The ordinance was adopted to meet State mandates on waste reduction.

Each customer will receive:

- Customer subscription order
- Summary of services
- Billing information

Check out our containers

As your franchise waste hauler, we provide a range of commercial bins and roll-offs for rent. Whether for construction and demolition projects, spring cleaning, home remodel, or tree trimming, these containers will fit your needs.
