

**COUNTY OF LOS ANGELES DEPARTMENT OF PUBLIC WORKS
ENVIRONMENTAL PROGRAMS DIVISION
SOLID WASTE FACILITIES SECTION**

Requirements for Importation of Clean Soil Material

1. Project Need

- a) Quantitative analysis of current soil situation at the site and justification for the need to import off-site soil for use as cover material or for any other purpose, including an accounting of known sources of potential soil importations (soil balance analysis)
- b) Amount of soil to be imported, delivery schedule, & frequency
- c) Purpose and Projected use of imported soil

2. Imported Soil Handling

- a) Haul routes for trucks carrying imported soil to designated scales/inspection area
- b) Stockpiling duration
- c) Dust control measures to minimize fugitive dust
- d) Earthmoving equipment (e.g. scrapers) to be used to transport imported soil

3. Program to Import Soil

- a) Prescreening program for imported soil
- b) Comprehensive information of the source and quality of the soil, including soils report and contamination data where available
- c) Area for maintaining soil stockpile to mitigate any temporary shortages in soil import, if necessary
- d) Soil importation plan including, but not limited to, the location where soil will be unloaded and/or stockpiled, stockpile boundary and height, implementation and utilization schedule, and grading and drainage plans

4. Grading and Drainage Plan Requirements and Guideline

- a) For grading activities within the Landfill's permitted "Limit of Fill," please visit: [link](#).
- b) For soil stockpiling and grading activities outside the Landfill's permitted "Limit of Fill," please visit: [link](#).

ALL GRADING AND/OR DRAINAGE PLANS FOR PROJECTS LOCATED IN THE UNINCORPORATED COUNTY AREAS MUST BE SUBMITTED TO THE SOLID WASTE FACILITIES SECTION OF ENVIRONMENTAL PROGRAMS DIVISION.

For additional information, please contact Solid Waste Facilities Section at (626) 458-3553 or landfills@dpw.lacounty.gov.
