**FINDING OF CONFORMANCE
PUENTE HILLS LANDFILL**

On February 20, 2003, the Task Force granted a Finding of Conformance (FOC) for the expansion of the Puente Hills Landfill. Condition 12 of the FOC requires the County Sanitation Districts of Los Angeles County (LACSD) to submit a quarterly report to the Task Force regarding the following:

- a. Type and quantity of waste received at the facility for processing, recycling, and disposal;
- b. Waste source and quantity for each jurisdiction of origin;
- c. Quantity of recovered recyclable materials and final destination;
- d. The information shall be provided in the format approved by the Task Force;
- e. Quantity of household hazardous waste and electronic waste, if any, recovered from the waste stream, and final destination;
- f. The first quarterly report is for the period of April 1 through June 30, 2003, and is due by July 31, 2003; and;
- g. Remaining landfill disposal capacity by weight (tons) and volume (cubic yards).

LACSD submitted the 2nd quarter 2009 report on July 20, 2009, providing the above information. Staff reviewed the report and has no comments. In addition, the above requested information for Puente Hills Landfill and other disposal facilities in the County is routinely collected online through the County's Solid Waste Information Management System (SWIMS), www.solidwasteredrs.org. Staff will be making a SWIMS presentation to the Task Force later this year.

Due to its large volume, only the cover letter is attached. The full report can be accessed online at www.dpw.lacounty.gov/epd/tf/Attachments/AgendaItems_Attachments/Puente_Hills_Monitoring_Report_2nd_Quarter_2009.pdf. A hardcopy is available upon request.

If you have any questions, please contact me at (626) 458-6973, Monday through Thursday, 7 a.m. to 5:30 p.m.

WASTE INSPECTION SUMMARY REPORT**

Puente Hills Landfill

April 2009

Note: The numbers within parentheses represent the Hazardous Waste Hauler that hauled the waste from the Districts site to the proper disposal point. A missing number indicates that the waste was unrecoverable. The letters next to the numbers within parentheses correspond to the ultimate point of disposal. Both the hazardous waste haulers and the ultimate disposal points are listed at the end of the report.

Districts' Action to Prevent Recurrence

Inspectors are continuing visual inspection of refuse loads as they are deposited at the working face to intercept such loads for proper disposal. For those incidents in which the company responsible for the improper disposal is known, the Districts contacted the firm's officials and informed them of the improper disposal. If the waste was hazardous, then the Districts informed the firm's officials of the appropriate hazardous waste regulation. The initial contact is followed by an enforcement letter.

WASTE INSPECTION SUMMARY REPORT**

Puente Hills Landfill

May 2009

Note: The numbers within parentheses represent the Hazardous Waste Hauler that hauled the waste from the Districts site to the proper disposal point. A missing number indicates that the waste was unrecoverable. The letters next to the numbers within parentheses correspond to the ultimate point of disposal. Both the hazardous waste haulers and the ultimate disposal points are listed at the end of the report.

Districts' Action to Prevent Recurrence

Inspectors are continuing visual inspection of refuse loads as they are deposited at the working face to intercept such loads for proper disposal. For those incidents in which the company responsible for the improper disposal is known, the Districts contacted the firm's officials and informed them of the improper disposal. If the waste was hazardous, then the Districts informed the firm's officials of the appropriate hazardous waste regulation. The initial contact is followed by an enforcement letter.

WASTE INSPECTION SUMMARY REPORT**

Puente Hills Landfill

June 2009

Note: The numbers within parentheses represent the Hazardous Waste Hauler that hauled the waste from the Districts site to the proper disposal point. A missing number indicates that the waste was unrecoverable. The letters next to the numbers within parentheses correspond to the ultimate point of disposal. Both the hazardous waste haulers and the ultimate disposal points are listed at the end of the report.

Districts' Action to Prevent Recurrence

Inspectors are continuing visual inspection of refuse loads as they are deposited at the working face to intercept such loads for proper disposal. For those incidents in which the company responsible for the improper disposal is known, the Districts contacted the firm's officials and informed them of the improper disposal. If the waste was hazardous, then the Districts informed the firm's officials of the appropriate hazardous waste regulation. The initial contact is followed by an enforcement letter.
