

ACKNOWLEDGEMENTS

The revised Countywide Siting Element is the product of the efforts of many individuals dedicated to the well-being of the residents of the 88 cities and all unincorporated communities in Los Angeles County. The County of Los Angeles and the Los Angeles County Department of Public Works would like to thank them for all their help for which we are most grateful.

We would especially like to thank the members of the Los Angeles County Solid Waste Management Committee/Integrated Waste Management Task Force and its Facility and Plan Review Subcommittee for their dedication and effort in developing goals and policies and reviewing and commenting on the revisions to the Countywide Siting Element (and its environmental document). Their efforts, direction, and dedication have ensured that these documents address the needs and concerns of the residents and businesses in Los Angeles County.

As the public information meetings are essential to the completion of the revised Countywide Siting Element and its environmental document, we would like to thank all those involved.

We would also like to thank the staff of Department of Public Works' Survey/Mapping and Property Management Division, Mapping and GIS Services Section, for their assistance in preparing the maps; Information Technology Division, for developing the CSE Revision Project website and providing web support; and Architectural Engineering Division, for providing contracting technical support for the CSE Revision Project.

The staff of Department of Public Works' Environmental Programs Division is also acknowledged for their dedication and efforts in the preparation of this document.

Finally, we would like to recognize and commend the citizens of Los Angeles County for all their input and responsiveness during the presentation of the revised Countywide Siting Element and its environmental document. It is through the cooperative efforts of all individuals committed to their communities and the environment that this revised Countywide Siting Element can be effectively implemented to achieve its goal of protecting public health and safety by addressing the need for environmentally safe, reliable, and economical solid waste disposal services for all residents and businesses in Los Angeles County.
