

April 15, 2010

Margret Clark
Vice-Chair
Los Angeles County Solid Waste Management
Committee/Integrated Waste Management Task Force

Dear Ms. Clark:

In response to your letter dated March 25, 2010 regarding progress of re-vegetation efforts at Sunshine Canyon Landfill we written documentation concerning our current and proposed efforts to maintain compliance with our Condition Use Permits granted by the County of Los Angeles for the county portion of the Landfill. We will continue to share our work plans and progress through quarterly status reports. The quarterly status reports will include the vegetation plan resulting from the SCAQMD Order of Abatement. In addition, Sunshine Canyon will incorporate best practices derived from a variety of sources to accomplish successful re-vegetation of the required for inactive cut slopes and other permanent slopes.

Respectfully,

Kurt Bratton
Market Vice President
