

**What Goes Where?** *The Culver City community is environmentally conscious and strives to reduce trash sent to local landfills.*

Many items placed into trash receptacles can be properly disposed of in a recycling or organics container instead. With the ever changing and tightening restrictions on recycling commodities accepted both overseas and domestically it is important to make sure that the correct items are being placed into the blue recycling and green organics container. The colorful image shows what items can be placed into each container – **Trash, Recycling, and Organics.**

**One of the most effective ways to reduce your environmental impact and trash sent to landfills is Reuse**

- Avoid single-use products.
  - ✓ A cloth can do the work of hundreds of paper towels,
  - ✓ A reusable food container can outlive hundreds of sandwich bags.
  - ✓ Choose multi-use alternatives whenever they are available.

**Culver City has adopted two environmental ordinances related to waste reduction:**

- Culver City Municipal Code 11.16 Plastic Carryout Bag Regulation;
- Culver City Municipal Code 11.18 Polystyrene Regulations.
