

CHIQUITA CANYON
a Waste Connections company

October 15, 2019

Ms. Margaret Clark
Los Angeles County Solid Waste Management Task Force
c/o Los Angeles County Department of Public Works
900 South Fremont Ave
Alhambra, California 91803

RE: Quarterly Report
Chiquita Canyon Landfill
Finding of Conformance

Dear Ms. Clark,

Chiquita Canyon Landfill (CCL) is submitting this quarterly monitoring report in compliance with the Finding of Conformance issued on August 14, 2018 for the Chiquita Canyon Landfill. This report is for the period of **July, August and September 2019**.

As mentioned in previous quarterly reports, the Waste Origin Survey Report is not included in this submittal. The Waste Origin Survey Report is filed online directly to the Department of Public Works by the required reporting deadline.

Quarterly Reporting Requirements:

1. Type and quantity of waste (weight) received at the facility for processing, recycling, used as landfill daily cover, and disposal.

Types and quantities of waste received at the facility during the quarterly period are documented on the forms provided as Attachment A-1. Information is provided for each month of the quarterly monitoring period. Clean green waste is processed separately from general refuse and is currently directed to off-site composting operations. Processed green waste from various transfer stations is either used as mulch for erosion control or as Alternative Daily Cover (ADC). Soils accepted during this period were utilized either as daily cover, road base or other beneficial use on site. Concrete rubble and processed C&D debris is diverted from disposal for beneficial use on site as road base or rip rap.

2. Waste source and quantity identified by weight and/or volume for each City, Los Angeles County unincorporated area, and any jurisdiction outside the County of Los Angeles.

CCL has set up tracking and accounting procedures to document the weight and/or volume of waste received by each jurisdiction. Information is collected and reported during the periods required by adopted disposal reporting regulations, Title 14, Sections 18800-18813. This Information is reported to you directly online.

3. Quantity of recovered recyclable materials, including tires and green waste, if any, by weight and/or volume, and final destination of recovered materials.

No recyclable materials were shipped off site during this reporting period.

4. Quantities of household hazardous waste, if any, recovered from the waste stream.

Attachment A-2 contains records of household hazardous wastes recovered from the waste stream as a result of our load check program. Prohibited wastes identified are either returned to the hauler/generator, if known, or stored in our hazardous waste storage area for proper disposal. The waste accumulated in the hazardous waste storage area is collected and transported to the appropriate handling facilities.

Please contact me at (661) 257-3655 with any questions regarding this report.

Sincerely,

Chiquita Canyon Landfill

Michael Hearn
Assistant District Manager
