

February 15, 2022

Ms. Dee Lugo
SCL – LEA Program Manager
5050 Commerce Drive
Baldwin Park, CA 91706

**Subject: January 2022 Monthly Report (MRMP 46, 96, 119 & 125)
Sunshine Canyon Landfill, SWFP No. 19-AA-2000**

Dear Ms. Dee Lugo

Pursuant to the self-monitoring report program requirements detailed on pages 3-4 of the Sunshine Canyon Landfill (SCL) Solid Waste Facilities Permit (SWFP), the following information is provided to the LEA for the month of January 2022.

Condition 16.a. – Types & Quantities of Non-Hazardous Waste Received

The attached copy of the monthly activity report includes a daily and weekly breakdown of waste tonnages received on site.

Condition 16.b., MRMP 91, Q-B.5.b – Number and Types of Vehicles Using the Facility

The attached copy of the monthly activity report includes the type and number of vehicles that use the facility on a daily and weekly basis.

Condition 16.c. – Results of the Hazardous Waste Load Checking Program

The types and quantities of hazardous waste and other prohibited wastes found in the waste stream are outlined below. All prohibited wastes are removed from the disposal area, quarantined in a designated location, and disposed in accordance with applicable requirements. The following is a list of prohibited wastes found during the month:

Prohibited Waste	Quantity	Units	Disposition
Paint Related	8	Gallons	Hazardous waste TSDF
Oil Related	0	Quarts	Hazardous waste TSDF
Batteries	5	Each	Hazardous waste TSDF or E-waste Recycler
Electronics	58	Each	E-waste Recycler
Construction and other Chemical Compounds	0	Gallons	Hazardous waste TSDF

Containers with Residuals	0	Each	Hazardous waste TSDF
Aerosols	0	Each	Hazardous waste TSDF

Condition 16.d., Q-B.5.c – Reports of all Special or Unusual Occurrences

The attached copy of the Monthly Log of Special Occurrences includes a detailed description of the incident and response actions taken.

Condition 16.e., Q-C.2, IMP X.B.7 & IMP X.B.6 – Compliance Summary

There were no private citizen caller complaints through the Sunshine Canyon 24-hour hotline in January 2022. A copy of the hotline call log for January 2022 is attached.

Condition 16.f. – Record of Receipt of Violation

SCL receive three NOV's from SCAQMD during the month of January 2022 for alleged odors on January 3, 13 and 31, 2022. SCL did not receive any AOC's during the month of January.

Condition 16.g., MRMP 34a-d – Results of Landfill Gas Monitoring & Control

The 2021 Third quarter 1150.1 Monitoring Report was submitted to SCAQMD on November 12th, 2021.

The perimeter probes are required to be read monthly, in accordance with Rule 1150.1. The results of the monthly probe monitoring showed readings of 0% (measured as methane) with the following exceptions:

Perimeter Probe	Date Monitored	Readings %CH ₄	Notes
P214-A	1/25/2022	0.1	
P214-B	1/25/2022	0.1	
P224-C	1/25/2022	0.1	
P225-C	1/25/2022	0.1	
P225-D	1/25/2022	0.1	
P227-A	1/25/2022	0.1	
P227-B	1/25/2022	0.1	
P227-C	1/25/2022	0.1	
P227-D	1/25/2022	0.1	
P228-B	1/25/2022	0.1	
P228-C	1/25/2022	0.1	
P229-C	1/25/2022	0.4	

P207-B	1/31/2022	0.4	
P207-C	1/31/2022	0.3	
P243-A	1/27/2022	0.1	
P245-B	1/27/2022	0.6	
P205R-C	1/27/2022	1.3	
P205R-D	1/27/2022	2.6	

Condition MRMP 109, CUP 48 – Daily Neighborhood Litter Survey

Daily Litter Survey – January 2022	Quantity of Bags & Other Items
Week One	14
Week Two	18
Week Three	26
Week Four	7
Week Five	0

Condition MRMP 53 – Groundwater Monitoring

The Groundwater and Waste Disposal Monitoring Report for the First Semi-Annual Monitoring Period of 2020 (RWQCB Facility Global ID No. L10006014618) was submitted on August 14, 2021. This report is available on the Water Board's Database, GeoTracker, at <https://geotracker.waterboards.ca.gov/>, or on Sunshine Canyon Landfill's website at www.sunshinecanyonlandfill.com.

Condition Q-C.10.d.8, CUP 77 – Alternative Fuel

The filling station located at 12881 Encinitas Avenue, Sylmar, California, intermittently provides E-85 fuel. When available the light duty trucks used at Sunshine Canyon Landfill have been fueling with E-85. When the E-85 fuel is not an option, the light duty trucks use unleaded fuel. The Alternative Fuel Logs for January 2022 is attached to this report and is as follows:

Alternative Fuel – January 2022	Quantity of E-85 Fuel Used
1/1/2022 – 1/31/2022	1,062.247

Should you have any questions regarding the information provided in this report please feel free to contact me directly at (818) 362 – 2112 or at Dmontano@Republicservices.com

Sincerely,

Dennis Montano
Environmental Specialist

Attachments: SCAQMD Notice Of Violation 010322.pdf

Good Morning,

AQMD issued the attached violation yesterday (1/6/22) for alleged odor complaints that occurred on January 3, 2022.

We were informed that there were 13 verified odor complaints between approximately 6:30 and 9:40 am. Three additional calls came in later that morning but were not verified.

Since receiving these complaints, we have continued to implement aggressive odor management protocols for the remainder of this week as we work around challenging wind/weather conditions. There is a lot of activity onsite, but we have not lost focus on odor abatement. The team is still highly engaged in the odor monitoring programs, including a full, dedicated odor patrol team every day.

Please feel free to reach out with any questions.

Thank you,
Kate

12/24/2021

Inspection Report Comments

The above facility was inspected for compliance with applicable sections of Division 30 of the Public Resources Code (PRC) and Title 14 and Title 27, California Code of Regulations (CCR).

This report is a compilation of the SCL-LEA staff observations for the period of 12/18/2021 to 12/24/2021.

During the dry portion of the week, the rills continued to be repaired and there were a few pumps in use in some of the ponding areas. However, there were still some areas that had exposed trash. The site experienced more rain events toward the end of the week and consequently the ponding areas filled up again. There were more issues with erosion control due to the rain. Directed operator to work on repairing the erosion areas and to work on getting more pumps to eliminate the ponding.

The spotters were directing traffic. The lighting was adequate during hours of darkness.

Alternative daily cover was used to cover up all waste at the end of the day's operation.

Litter fences were in place around the working faces to assist in controlling the litter.

The portable water-atomizing cannons were in use. Misters were also in use on the perimeter fences and along the haul road for odor control.

The water trucks and sweepers were in use for dust control.

The bird control measures were in place to control the birds.

The load checks were conducted during this observation period.

No Violations

Areas of Concern

27 CCR 20820 - Drainage and Erosion Control

The operator continued their efforts to improve the areas with exposed trash, erosion and ponding issues. However more heavy rain events impacted the site during this inspection period preventing the site from controlling the ponding and exposed trash problems.

(a) The drainage system shall be designed and maintained to:

(1) ensure integrity of roads, structures, and gas monitoring and control systems;

Disposal Facility (Site) Inspection Report (52)
Sunshine Canyon City/County Landfill (19-AA-2000)
12/31/2021

- (2) prevent safety hazards, and
- (3) prevent exposure of waste.

27 CCR 20650 - Grading of Fill Surfaces

During this inspection period, observed several ponds in the county portions of the landfill. Even though the operator was actively using pumps, they could not control the ponding due to the heavy rain events.

Covered surfaces of the disposal area shall be graded to promote lateral runoff of precipitation and to prevent ponding. Grades shall be established of sufficient slopes to account for future settlement of the fill surface.

Inspection Report Comments

The above facility was inspected for compliance with applicable sections of Division 30 of the Public Resources Code (PRC) and Title 14 and Title 27, California Code of Regulations (CCR).

This report is a compilation of the SCL-LEA staff observations for the period of 12/25/2021 to 12/31/2021.

The operator continued their efforts to improve the erosion and ponding areas. However more heavy rain events impacted the site during this inspection period. Therefore, the site continued with erosion and ponding issues and areas with exposed trash.

Alternative daily cover was used to cover up all waste at the end of the day's operation.

The spotters were directing traffic. The lighting was adequate during hours of darkness.

Litter fences were in place around the working faces to assist in controlling the litter.

the slope above and below the Cell CC-IV, Part 4A were not covered by the end of this inspection period.

The erosions in the northwestern County part of the landfill over the filled areas were also not covered by the end of this inspection period.

The operator must take immediate action to prevent further rill erosion on the side slopes and erosion of the landfill cover.

The other areas where the Intermediate Cover Enhancements (ICE), the Closure Turf and the Vegetative Cover were installed and applied held up well after the rain.

27 CCR 20650 - Grading of Fill Surfaces

Covered surfaces of the disposal area shall be graded to promote lateral runoff of precipitation and to prevent ponding. Grades shall be established of sufficient slopes to account for future settlement of the fill surface.

The landfill received more rains this past week. Multiple ponds were observed on site, with most of the ponds in the northwestern County part of the landfill over the filled areas. The operator was instructed to pump out the ponded areas as soon as possible and re-grade the area to divert the runoff away from the disposal area as soon as it is safe to do so.

The covered surfaces of the disposal area must be graded to promote lateral runoff of precipitation and of sufficient slopes to prevent water accumulation and/or infiltration into any filled areas.

Inspection Report Comments

This report is a compilation of the SCL-LEA staff observations for the period of 01/01/2022 to 01/07/2022.

The landfill was opened on Saturday, January 1st for New Year's Day.

Area of concerns were noted for erosions and ponding on site.

Weather conditions were clear and brisk during this observation period.

Two working faces were in use in the CC4-Part 3 and CC4-Part 4A area. The alternative daily covers were effective in covering up all waste at the end of the day's operation.

The spotters were directing traffic.

The portable water-atomizing cannons were in use. Misters were also in use on the perimeter fences and along the haul road for odor control.

The water trucks and sweepers were in use for washing mud off the road and for dust control.

Disposal Facility (Site) Inspection Report (52)
Sunshine Canyon City/County Landfill (19-AA-2000)
1/7/2022

The bird control measures were in place to control the birds.

The load checks were conducted during this observation period.

The lining of the next cell, adjacent to cell CC4-Part 4A, continued during this observation period. The lining work did not interfere with the normal traffic flow as of this observation period.

Land Owners(s):
Browning-Ferris Ind. Of Calif., Inc.

The above facility was inspected for compliance with applicable sections of Division 30 of the Public Resources Code (PRC) and Title 14 and Title 27, California Code of Regulations (CCR).

No Violations

Areas of Concern

27 CCR 20820 - Drainage and Erosion Control

(a) The drainage system shall be designed and maintained to:

- (1) ensure integrity of roads, structures, and gas monitoring and control systems;
- (2) prevent safety hazards; and
- (3) prevent exposure of waste.

The landfill received the last heavy rain on 12/30/2021. The exposed trash left from

Disposal Facility (Site) Inspection Report (52)
Sunshine Canyon City/County Landfill (19-AA-2000)
1/28/2022

some of the drained ponds in the northwestern County part of the landfill were not covered by the end of this inspection period.

The operator must take immediate action to prevent further rill erosion on the side slopes and erosion of the landfill cover.

27 CCR 20650 - Grading of Fill Surfaces

Covered surfaces of the disposal area shall be graded to promote lateral runoff of precipitation and to prevent ponding. Grades shall be established of sufficient slopes to account for future settlement of the fill surface.

The landfill received the last heavy rain on 12/30/2021. The operator had been pumping out the ponds and reducing their sizes. However, ponding continues to be observed in the northwestern County part of the landfill over the filled areas. The operator was instructed to pump out all of the ponded areas as soon as possible and re-grade the area to divert the runoff away from the disposal area as soon as it is safe to do so.

The covered surfaces of the disposal area must be graded to promote lateral runoff of precipitation and of sufficient slopes to prevent water accumulation and/or infiltration into any filled areas.

Inspection Report Comments

This report is a compilation of the SCL-LEA staff observations for the period of 01/22/2022 to 01/28/2022.

Area of concerns continue to be noted for exposure of waste and ponding on site.

Weather conditions were fair with a few windy days during this observation period.

One working face was in use in the bottom CC4-Part 4A area. The alternative daily covers were effective in covering up all waste at the end of the day's operation.

The spotters were directing traffic.

The operator was reminded to keep up with the removal of the accumulated litter on site. Litter pickers were collecting windblown litter on site. No windblown litter was observed to be leaving through the front of the landfill as of this observation period.

The portable water-atomizing cannons were in use. Misters were also in use on the perimeter fences and along the haul road for odor control.

The water trucks and sweepers were in use for dust control.

The bird control measures were in place to control the birds.

Disposal Facility (Site) Inspection Report (52)
Sunshine Canyon City/County Landfill (19-AA-2000)
1/28/2022

The load checks were conducted during this observation period.

The lining of the next cell, adjacent to cell CC4-Part 4A, continued during this observation period. The lining work did not interfere with the normal traffic flow as of this observation period.
