Re: Chiquita Canyon Landfill – Third Supplemental CUP Condition No. 69 Report

Dear Mr. Nguyen:

Condition 69 of Chiquita Canyon, LLC's ("Chiquita") Conditional Use Permit ("CUP") requires that, upon receiving four Notices of Violation ("NOVs") related to air quality in a given calendar year, Chiquita must submit a report to Los Angeles County Public Works ("PW") within 30 days after the fourth NOV, explaining the NOV and the steps taken to address it. Chiquita must also provide such a report within 30 days of receiving any additional air quality related NOVs within the same calendar year.

The South Coast Air Quality Management District ("South Coast AQMD") issued Chiquita NOVs for violations of South Coast AQMD Rule 402 and California Health & Safety Code § 41700, triggering Chiquita's obligation to provide a report under CUP Condition 69, which Chiquita submitted on July 27, 2023. Chiquita submitted supplemental reports on August 23 and September 22, 2023. Since the submission of the September 22 report, the South Coast AQMD issued Chiquita sixteen additional Rule 402 NOVs for violations alleged to have occurred in September and October 2023.

South Coast AQMD NOVs – Explanation and Corrective Action

A discussion of each South Coast AQMD NOV, along with corrective action taken by Chiquita in response to these NOVs, is provided below.

Explanation

Each of the NOV's issued by South Coast AQMD made identical allegations. The NOV's are provided at Attachment A.¹ Each NOV was issued after a South Coast AQMD inspector verified complaints about odors alleged to be coming from the Chiquita Canyon Landfill ("Landfill"). These NOV's were substantively the same as prior NOV's issued by South Coast AQMD that were addressed in Chiquita's July 27, August 23, and September 22 Condition 69 reports. The source of the odors is the same as described in those reports: an increase in the production of landfill gas and liquids caused by an abnormal reaction taking place within an older portion of the Landfill waste mass.

Corrective Action

Chiquita provided detailed descriptions of corrective actions taken to mitigate the reaction and any odors emanating from the Landfill in the July 27, August 23, and September 22 reports. While Chiquita does not repeat information provided in the earlier reports in this report, it continues to take all actions listed in those reports. The corrective action described in this section includes only new measures taken since the last update.

South Coast AQMD Stipulated Order for Abatement: Under the South Coast AQMD Stipulated Order, Chiquita has taken the following additional mitigation measures since the September 22 report:

- Chiquita received the South Coast AQMD permit for the new permanent flare (Flare 3) on September 28, and the new flare arrived onsite on October 10. Chiquita is now working to install this flare. Under the Stipulated Order, Chiquita has until November 24 to install the flare, but Chiquita is working to install it sooner.
- Chiquita is in the process of applying for a second new permanent flare (Flare 4).
- Chiquita is continuing to expand the landfill gas well system as needed. In September, Chiquita installed nineteen new vertical gas wells and connected them to either the existing landfill gas collection system or the portable thermal oxidizer.
- Chiquita is continuing to expand its liquids extraction and collection capabilities. In September, Chiquita installed twenty-one new pumps in its vertical gas wells, bringing the total number of wells equipped with pumps to thirty-one.

¹ The NOV numbers and dates of the alleged violations are as follows: NOV P80507 (September 22, 2023), NOV P78422 (September 25, 2023), NOV P78290 (September 26, 2023), NOV P77662 (September 27, 2023), NOV P70073 (September 28, 2023), NOV P79511 (October 2, 2023), NOV P80508 (October 3, 2023), NOV P79060 (October 5, 2023), NOV P73832 (October 9, 2023), NOV P78025 (October 10, 2023), NOV P77616 (October 13, 2023), NOV P77617 (October 16, 2023), NOV P75987 (October 17, 2023), NOV P79063 (October 18, 2023), NOV P75748 (October 19, 2023), and NOV P75559 (October 20, 2023).

- Chiquita is working to procure and install the geosynthetic cover that will cover western portions of the Landfill to limit the migration of landfill gas from the site.

More detailed information on Chiquita's implementation of and compliance with the Stipulated Order is available on Chiquita's Odor Mitigation website (<https://chiquitacanyon.com/reports/odor-mitigation/>) and in Chiquita's September 2023 monthly report to the South Coast AQMD, which is available on the website.

Additional flaring capacity: Chiquita is finalizing the acquisition and installation of an additional portable thermal oxidizer ("TOX") that the Landfill will use in the short-term to further increase control capacity. As of October 20, the TOX is onsite and installation should be complete by October 27.

Additional perimeter misters: Chiquita is expanding its perimeter misting system. Chiquita has installed 2,000 feet of misting system around the northeast corner of the Landfill and is in the process of installing another 2,000 feet on the west side of the Landfill.

Installing well boot seals: Chiquita will begin installing well boot seals on wells in the reaction area in November 2023.

Geosynthetic cover: Chiquita is extending the geographic scope of the geosynthetic cover that was previously designed to cover the western slope of the reaction area to also cover the northern slope of the reaction area. Once the rate of settlement in the reaction area has normalized, Chiquita will also place a light scrim or flexible membrane liner over non-sloped portions of the reaction area.

Distributing air filtration devices to local residents: As described in the August 23 report, Chiquita is continuing to provide in-home air filtration devices upon request to those community members closest to the Landfill and affected by odors. More information on this program can be found on Chiquita's website.

Enhanced and expanded community air monitoring: At the direction of the Los Angeles County Department of Public Health ("DPH"), Chiquita has enhanced and expanded its current air monitoring program to include monitoring for DMS and other constituents in the community, sampling at residential locations where recent odor complaints have been reported, sampling at additional on-site locations, and conducting a flux chamber study. Chiquita is reporting all monitoring results to DPH. These data and reports can be found on Chiquita's website. The data for August 2023 was submitted to DPH on September 20. Toxicologists from the Center for Toxicology and Environmental Health ("CTEH") reviewed the August data and prepared an initial analysis that is available on Chiquita's website. The data for September 2023 was submitted to DPH on October 20. The toxicologists are in the process of reviewing this data. For additional information on this expanded air monitoring, please see Chiquita's August 15 submission to DPH.

Mr. David Nguyen
Los Angeles County Public Works
