Public Works Overview

"We deliver regional infrastructure and services improving the quality of life for more than 10 million people in Los Angeles County."

Los Angeles County Public Works was formed in January 1985, consolidating the former County Road Department, the County Engineer Department, and the County Flood Control District.

With a Vision to become the most trusted public agency in the region, Public Works has been defined by its responsiveness to the public, commitment to provide excellent customer service, and drive to build great community relations. Public Works' workforce takes pride in being public servants providing essential and critical services for all residents and businesses in Los Angeles County.

Public Works' diverse operations are defined within six core service areas: Water Resources, Transportation, Environmental Services, Public Buildings, Development Services, and Emergency Management. Its annual budget of \$2.3 billion is funded by restricted revenues, such as gas excise and sales tax, benefit assessment, water and sewer sales, user fees, and contract cities revenues.

Public Works is strategically focused on supporting economic development through business-friendly contracting opportunities that will better serve the County's small businesses and local worker hiring objectives. In Fiscal Year 2018-19, Public Works awarded over \$770 million worth of contracts within Los Angeles County, which helped create 9,536 jobs. (See Appendix 2 for more details on Business Outreach).

Public Works' workforce is comprised of nearly 4,000 employees in more than 500 job classifications, including professional, technical, clerical, and skilled crafts.

Headquartered at 900 South Fremont Avenue in Alhambra, Public Works has 77 field facilities throughout Los Angeles County.

FY 2018-19 Core Service Areas Final Adopted Budget

CORE SERVICE AREAS	AMOUNT	PERCENTAGE
Water Resources	\$746,852,000	44.0%
Transportation	\$680,403,000	40.1%
Environmental Services	\$98,242,000	5.8%
Public Buildings *	\$64,311,000	3.8%
Development Services	\$96,499,000	5.7%
Emergency Management	\$10,997,000	0.6%
Total Core Service Areas Budget	\$1,697,304,000	100%
Others**	\$646,971,000	
Total Final Adopted Budget	\$2,344,275,000	

* Final Adopted Budget for Public Buildings Core Service Area includes project management costs only. It does not include construction costs.

** Includes cross-business functions.

Water Resources

"We provide sustainable water supplies and healthy watersheds, while reducing flood risk for our communities."

Morris Dam

14
dams

Providing flood protection for
10 million people
and contributing to their water supply

MAJOR PROGRAMS/SERVICES

Through the Los Angeles County Flood Control and Waterworks Districts, Public Works is responsible for Countywide water resource management, which includes flood risk management, water supply, and watershed health.

Flood Risk Management and Water Conservation

The Los Angeles County Flood Control District was established under the Los Angeles County Flood Control Act in 1915. The Act empowered the District to provide flood protection, water conservation, recreation and aesthetic enhancement within its boundaries. The Flood Control District is governed, as a separate entity, by the County of Los Angeles Board of Supervisors.

On behalf of the Los Angeles County Flood Control District, Public Works constructs, operates, and maintains a regional system of flood control and water conservation facilities that provide flood protection and increase local water supply. The annual average expenditure of the Los Angeles County Flood Control District is \$275 million, with major funding from property taxes and a property benefit assessment for flood control.

The Flood Control District encompasses more than 2,700 square miles and approximately 2.1 million land parcels within 6 major watersheds. It includes drainage infrastructure within 86 incorporated cities as well as the unincorporated County areas. This includes 14 major dams and reservoirs, 483 miles of open channel, 27 spreading grounds, 3,380 miles of underground storm drains, 48 pump plants, 173 debris basins, 27 sediment placement sites, 3 seawater intrusion barriers and an estimated over 82,000 catch basins.

The reservoirs assist in recharging groundwater, which helps Los Angeles retain a supply of drinking water. Water from the reservoirs is released, as needed, and moves through a system of open channels into spreading grounds, where it replenishes groundwater basins by slowly percolating, or infiltrating, into the ground. The groundwater basins are accessed by wells, providing a valuable and reliable source of local drinking water.

250,000

residents have access to new recreation opportunities at Flood Control District facilities within one mile of their homes

By conserving water in reservoirs, Los Angeles County relies less on imported water from other areas of California. The flood control system ensures that the greatest amount of water is captured in reservoirs and diverted into spreading grounds instead of being lost to the ocean.

Local groundwater provides one-third of the region's water supply. The Flood Control District's spreading operations significantly help to recharge these local groundwater aquifers.

The Flood Risk Management Program includes planning; operation; maintenance; emergency storm response; storm drain rehabilitation; debris protection; floodplain management; public service; and construction of storm protection facilities, such as dams, channels, debris basins, storm drains, pumps, and removal of accumulated debris from reservoirs, debris basins, and debris retaining inlets.

Public Works also operates and maintains three seawater intrusion barriers along Los Angeles County's coastline. Often unnoticed because of their underground nature, these facilities serve as Los Angeles basin's fresh water sentinels. They protect a significant portion of the area's drinking water supply from ocean water, which constantly attempts to migrate into existing aquifers. Treated imported and reclaimed water is injected deep into the underground aquifers to block this inland migration of saltwater.

Another vital component of the Flood Risk Management Program is the removal of accumulated debris from the numerous reservoirs and debris basins, which protect nearby communities. Debris removal from the reservoirs also restores capacity, which the region needs for stormwater conservation.

Integrated Regional Water Management Program (IRWMP)

Public Works leads the Greater Los Angeles County (IRWMP), the largest regional water management group in the State involving 30 regional water management agencies.

The IRWMP planning process successfully brings together and prioritizes water-related efforts in the region in a systematic way to ensure sustainable water uses, reliable water supplies, better water quality, environmental stewardship, efficient urban development, protection of agriculture, and a strong economy. Through IRWMP, Public Works partners with regional water stakeholders and agencies to implement regional solutions through open and collaborative stakeholder processes to promote sustainable water use in the Los Angeles region.

Since its inception in 2008, IRWMP has successfully secured more than \$127 million in water resource grants for 74 projects.

In 2017-18, Public Works:

- Collaborated with 78 cities in 19 watershed groups to develop plans to improve stormwater/urban runoff quality.
- Invested \$86 million in Countywide stormwater quality improvements .
- Secured more than \$9.8 million in IRWM grant funding.

Over the last 10 years, Public Works:

- **Increased the stormwater recharge capacity** at its facilities by approximately 17,680 acre-feet per year.
- **Invested more than \$161 million** in rehabilitating its dams and increasing their operational efficiency.
- **Invested more than \$58 million** in enhancing the capacity and operational efficiency of its spreading grounds and seawater barriers.

Public Works recharges enough groundwater from various sources annually to serve **1.9 million residents**

240,000

water customers served in
Marina del Rey, Malibu,
Val Verde, Acton, Kagel Canyon,
Antelope Valley

Average Annual Contribution to Regional Water Supply*

 **200,000** acre-feet
Stormwater

 **90,000** acre-feet
Imported water

 **50,000** acre-feet
Recycled water

Water Utilities

Public Works also provides retail water service to over 240,000 residents through the management of five County Waterworks Districts, the Marina del Rey water system, and the Rancho Los Amigos Water System. The systems are comprised of 1,346 miles of water mains, 122 storage tanks, and 145 pump stations and includes the following five District areas:

- Malibu (SD3)
- Val Verde (SD5)
- Acton (SD5)
- Kagel Canyon (SD5)
- Antelope Valley (SD5)

The Los Angeles County Waterworks Districts operates out of three District offices (Alhambra, Malibu, and Lancaster) and maintains an award-winning online water account management system (MyWAM) for customers to easily access and manage their account online, anytime, anywhere and offers a “Live Chat” feature to enhance the customer service experience.

County Waterworks Districts also manages a robust water conservation program and is on track to meet the State mandate to reduce daily per capita water usage by 20 percent by the year 2020. The program includes:

- Residential Rebate Program - offering rebates to customers on a variety of water-saving devices.
- Cash For Grass Program - offering customers \$1 per square foot of grass replaced with water-efficient landscaping.
- Xeriscape Education Program - education on landscaping with plants that use less water.
- County iPhone application to report Water Waste.

County Waterworks has also partnered with the Cities of Lancaster and Palmdale for the design, construction, and operation of an 18 mile recycled water system and the use of recycled water in the Antelope Valley.

The annual budget for these Waterworks Districts is \$165 million and is financed primarily through water retail sales and general tax levy.

Over the last year, **21 low-flow diversions** have prevented around **182 million gallons** (equivalent to 5 million bathtubs) of polluted urban runoff from entering local waterways

Watershed Health Program

Public Works is responsible for planning and implementing projects and programs to improve surface water quality in unincorporated County areas and is the lead Agency for the Los Angeles County Municipal Stormwater (MS4) Permit issued by the Regional Water Quality Control Board to the County of Los Angeles (unincorporated areas) and to the Los Angeles County Flood Control District (jurisdictional areas).

The current 2012 permit includes the County, the Flood Control District and 84 municipalities as permittees, and requires permittees to collectively control pollutant discharges into the municipal stormwater system and to meet 33 Total Maximum Daily Loads requirements. The permit requires a regional collaboration and Public Works is participating in 19 Watershed groups that were formed to complete watershed management plans to collectively develop and implement projects/programs to meet MS4 permit requirements and to identify opportunities for water quality projects that will also increase stormwater reuse and augment local water supply. These watershed groups have developed detailed plans that were approved by the Los Angeles Regional Water Quality Control Board.

Annually, the County invests over \$70 million in Countywide stormwater quality improvements.

Rio Hondo Spreading Grounds

KEY ISSUES/CHALLENGES

- **Drought/Climate Change**
 - Our region is subject to extended periods of drought with few, intense rain events.
 - In April 2015, Governor Brown issued an Executive Order requiring a Statewide mandatory reduction of 25 percent in potable water use in response to the unprecedented drought.
 - The Board responded by implementing the Waterworks District's Phased Water Conservation Plan, including water conservation surcharges in the Malibu/Topanga Canyon and Antelope Valley regions.
 - Although the rainstorms of the past winter provided some relief and water conservation targets are no longer mandatory, outreach and education programs are in place to continue to strongly encourage water conservation throughout the Districts.
 - Climate change is expected to reduce the reliability of imported water delivered to Los Angeles County. This will require an increased emphasis on development of local sources of water to increase the sustainability of our water supply.
- **Improving Water Body Health**
 - Federal and State regulations establish water quality standards to protect the beneficial uses of water bodies, which include aquatic habitat and recreation. New regulations continue to be developed.
 - Water bodies within Los Angeles County (rivers, lakes, and the ocean) are impaired by various pollutants, which negatively impact the aquatic habitat and recreation. Stormwater, urban runoff, and other discharges are a source of these pollutants.
 - Many of these rivers and lakes are part of the urban flood control infrastructure belonging to the Flood Control District, such as the Los Angeles River, Verdugo Wash, and the Arroyo Seco Channel.
 - The unincorporated areas of the County and the Flood Control District (along with other Cities in the County) are required to develop and implement programs to reduce pollutants entering water bodies. These programs are costly and existing funding is limited.
 - The cost to meet water-quality standards in Los Angeles County is estimated at \$20 billion dollars over the next 20 years. Most local agencies lack a reliable source of revenue to meet the long-term challenges.

KEY PRIORITIES

- **Regional Water Supply Sustainability**

- *H2O4LA / Water Resilience* - Finalize the Water Resilience Plan draft and develop a Stormwater Expenditure Plan with broad stakeholder engagement that establishes a joint vision for a secure water future.
- Increase capacity of reservoirs and spreading basins through systematic optimization of facilities and sediment management.

- **Community Water Resilience**

- Facilitate and support master planning processes through broad stakeholder engagement and development of representative documents for waterways like the Los Angeles and San Gabriel Rivers.
- Formalize and launch a program to reduce flood risk and address other community needs in close collaboration with local jurisdictions.
- Implement strategies that encourage multibenefit project development and leverage a variety of funding sources through targeted collaboration.

- **Infrastructure Management**

- Implement comprehensive assessment of water infrastructure and develop long-term plans for repair, replacement, and upgrade to optimize flood protection.
- Develop a master asset management plan to assist in coordinating all operations and management activities and educating local communities.

- **Education and Outreach**

- Design and implement a public relations strategy that integrates education and outreach on water management practices, ongoing challenges, and future solutions.
- Support the County in implementing Homeless Initiative strategies applicable to Public Works' operations.

- **Financing and Efficiency**

- Identify and implement most effective methods for staff training and succession planning in support of workforce reinvestment.
- Promote integration of alternative funding sources and cost-sharing strategies in development of project budgets.

KEY PRIORITY STATUS (FIRST QUARTER: JULY – SEPTEMBER 2019)

Priority: Regional Water Supply Sustainability

1. Public Works continues to lead and coordinate efforts to establish a sustainable regional water supply through integrated water management as demonstrated by the following accomplishments:
 - Chairing the Steering Committee providing co-funding, and participating in technical review for the Las Virgenes Municipal Water District White Paper, which evaluates the use of existing wastewater and stormwater infrastructure to create new regional water supplies. White paper is on schedule for completion in early 2020.
 - Continuing to work with UCLA to develop the scope for a study which will evaluate the impact of climate change on Flood Control District infrastructure.
 - Working with the City of Los Angeles Department of Water and Power on an agreement to recharge up to 3,500 acre-feet of recycled water annually at Hansen Spreading Grounds.
2. Public Works continues to lead Safe, Clean Water Program implementation. The Program will provide local, dedicated funding to increase local water supply, improve water quality, enhance communities, and protect public health in Los Angeles County. Accomplishments include:
 - Adoption of the Implementation Ordinance on August 6, 2019 that codified many of the details previously described in the Program Elements.
 - The Board of Supervisors appointed governance/oversight committee members to their respective committee seats at the July 30, 2019 Board meeting.
 - The Fiscal Year 2019-20 Special Parcel Tax roll database has been submitted to the Los Angeles County Auditor-Controller to appear on the Fall 2019 property tax bills.
3. Completed 65 percent construction of the Upper Amargosa Creek Recharge Project. The Los Angeles County Waterworks District No. 40 has partnered with the City of Palmdale, AVEK, and Palmdale Water District on the Upper Amargosa Creek Flood Control, Recharge, and Habitat Restoration Project. This project consists of the construction of a permanent concrete aqueduct turnout structure, metering vault, and control building with conveyance pipeline. The 48-inch conveyance pipeline and turnout structure will transport water from the California Aqueduct to the groundwater recharge basins alongside Upper Amargosa Creek. This project will provide the necessary infrastructure to expand groundwater basin banking and recovery operations in the Antelope Valley Region. The project is scheduled for completion in early October 2019.

Priority: Community Water Resilience

1. Public Works continues to work toward the development of a Triple Bottom Line Cost/Benefit Tool as it continues to lead integrated efforts to address regional and community drainage needs.
2. Public Works advanced the development of the Los Angeles River Master Plan Update, due for completion by June 2020. Community partner events were held on July 1, 2019 in Pacoima and August 3, 2019 at Rio de Los Angeles State Park. The Steering Committee met on September 25, 2019 to review draft components of the plan and the plan's goals.
3. Construction started on the Ladera Park Stormwater Capture Project in July 2019 in the unincorporated community of View Park-Windsor Hills. The total construction contract was \$4.94 million. The project will divert urban and stormwater for groundwater infiltration using dry wells and landscape irrigation reuse. The Project will also include above ground park improvements, including a demonstration garden, drought tolerant landscaping, low impact-development features, and educational signage.

Priority: Infrastructure Management

1. The Devil's Gate Reservoir Restoration Project is in the midst of sediment removal operations, with the end goal being the removal of 1.7 million cubic yards of sediment over the span of 4 years. At project completion, it will maintain a permanent maintenance area from which 42 acres can be cleaned of newly accumulated sediment on an annual basis. The project's Community-First approach has resulted in additional project measures including:

- Ensuring trucks are in compliance with required emissions
- Conducting air quality monitoring
- Modifying traffic lights, and
- Additional community outreach

In addition, the project's habitat restoration component continues in the 70 acres surrounding the permanent maintenance area, resulting in the removal of extensive amounts of non-native vegetation, installation of temporary irrigation, application of native species seed, and installation of native species container plants.

2. Since FY 2017-18, Public Works has been preparing condition assessments for its water infrastructure. To date, the condition assessments for debris basins, levees, concrete channels, spreading grounds, pump stations, low flow diversions, and ocean outlets are approximately 20 percent complete. The condition assessments for storm drains is approximately 10 percent complete.
3. While pursuing advances in the development of the Flood Control District's (FCD) flood risk mitigation infrastructure Capital Improvement and Asset Management Programs, the FCD has initiated the assessment of an additional 135 miles of open flood control channels.
4. In May 2019, Public Works awarded a \$1.1 million contract for the construction of the Avenue M and 5th Avenue East Wellhead Arsenic Treatment System Project, which will lower naturally occurring arsenic in the groundwater wells in Waterworks District 40, and in turn increase local water supply and resiliency during drought periods. Construction is anticipated to begin in October 2019.
5. In August 2019, Public Works accepted the Metropolitan Los Angeles Branch of the American Society of Civil Engineers' 2019 award for Outstanding Civil Engineering Project in the Los Angeles County Area for its collaborative, multi-pronged response to floodplain management issues arising from the 2018 Woolsey Fire.

Priority: Education and Outreach

1. The Los Angeles County Flood Control District (District) is implementing a multimedia, anti-littering outreach campaign in the Ballona Creek watershed to help reduce the pollutants that enter the creek. The campaign's primary objective is to increase the awareness and knowledge of the residents in the watershed through multi-platform public outreach which includes billboards, digital ads, transit stops, and brochures. The campaign was launched in June 2019 and is expected to be completed in September 2019. The campaign is estimated to have garnered approximately 13 million impressions. The District may expand these efforts Countywide in the near future.
2. Public Works continues to meet and work collaboratively with non-governmental organizations, such as OurWaterLA, a coalition of environmental groups which includes, among others, LA Waterkeeper, Natural Resources Defense Council, Heal the Bay, Nature for All, and Treepeople, to discuss and identify stormwater project objectives, ideas, and priorities. A recent meeting provided a forum for the County to share its efforts and progress with incorporating nature-based solutions in its current suite of stormwater projects. The NGOs have provided valuable information on incorporating best available science and engineering practices in reaching such nature-based solutions, as well as creative ideas on community outreach. Bi-monthly meetings will be scheduled to continue this conversation, to offer project updates, and to strengthen relationships among public stakeholders of these projects.
3. Public Works continues to provide technical assistance to the Woolsey Fire communities of Malibou Lake and Seminole Springs in their efforts to restore their recreational lakes.
4. The Los Angeles County Waterworks Districts (LACWD) sponsored a booth at the annual Antelope Valley Fair from August 16-25, 2019 on behalf of Public Works, providing visitors with information on water conservation programs, infrastructure improvement projects, education, and promotional items.
5. Public Works has initiated the update of the County's Floodplain Management Plan, which is an overall strategy of programs (including a Program of Public Information), projects, and measures aimed at reducing the adverse impacts of flood hazards on the community. The FMP identifies and addresses the impacts caused by flood hazards and provides specific mitigation measures to help protect the properties and their occupants. To guide the development of the FMP update, Public Works is forming a Steering Committee comprised of representatives from local government, non-profit groups, businesses, and members of the general public. The FMP update is anticipated to be completed in Fall 2020.
6. Public Works continues to build strategic relationships with its peers in floodplain management. In September 2019, Public Works gave a presentation at the Floodplain Management Association's 2019 Annual Conference on Public Works' collaborative, multi-pronged response to floodplain management issues arising from the 2018 Woolsey Fire.
7. Public Works continues to reach out to our community through recent summer events such as Parks After Dark at local County parks to inform local residents of stormwater capture and green street projects that will be constructed in their neighborhood. Through the use of visual project boards, interactive models and sample materials, and multilingual staff, project concepts are conveyed to our residents in a casual and easy-to-understand conversation that encourages the flow of ideas and concerns. In addition, Public Works engineers continue to participate in the STEM (Science, Technology, Engineering, and Math) Program at local schools by incorporating these concepts into real-world, public works projects. The program inspires students to think and learn using these concepts in a cohesive manner, bringing their understanding to their families at home, and inspiring careers in these industries.

Priority: Financing and Efficiency

1. Continued exercising Workforce Reinvestment strategies, which aim to identify opportunities to decrease external contracting and develop in-house resources.

Transportation

"We provide safe, clean, efficient transportation choices and rights-of-way to enhance mobility and quality of life."

74 % of residents in unincorporated Los Angeles County live within 1 mile of a bicycle network

68% of residents in unincorporated Los Angeles County live within 1/4 mile of public transit

MAJOR PROGRAMS/SERVICES

Public Works' Transportation Core Service Area promotes Countywide mobility and multimodal transportation opportunities, managing over 4,200 centerline miles of County and contract city roads, transportation infrastructure, programs, and services including:

Road Infrastructure

Public Works manages the County Transportation Improvement Program for road improvement projects and annual operations and maintenance efforts, funded primarily from gas tax funds, Proposition C, Measure R, and new Measure M Local Return funds, and Federal, State, regional grant programs. Projects include traffic safety and operational improvements, pavement rehabilitation, roadway drainage, active transportation, street lighting, green street, and beautification projects.

Road Maintenance and Operations staff operate out of field facilities located throughout the County and provide comprehensive maintenance activities and emergency response, including pavement patching and resurfacing; litter and debris removal; sidewalk, curb, and gutter repair; guardrail maintenance; snow removal; street sweeping; median landscape maintenance; street lighting; vegetation control; bike path maintenance; tree trimming; parkway maintenance; traffic signing and striping; pavement marking; and traffic signal operations and maintenance.

Bridge Infrastructure

Public Works inspects and maintains 533 County-owned bridges and inspects 1,168 city-owned bridges under contract city services. Public Works is also responsible for safety inspections and evaluations of 1,277 highway bridges listed in the National Bridge Inventory within Los Angeles County and serves as the lead agency for the seismic retrofit of nonstate-owned bridges within Los Angeles County as part of the Statewide Seismic Safety Retrofit Program.

Traffic Programs & Services

The County leads a multijurisdictional Traffic Signal Synchronization and Intelligent Transportation System effort, which has provided approximately \$275 million dollars' worth of improvements to nearly 70 agencies Countywide through the Los Angeles County Metropolitan Transportation Authority's Call for Projects bi-annual grant funding program.

Public Works also monitors and controls traffic signals Countywide from its state-of-the-art Traffic Management Center in Alhambra and manages additional traffic safety programs and services such as the following:

- Suggested Routes To School Program
- County Lighting Maintenance Districts (Streetlights)
- Traffic Safety and Vision Zero
- Los Angeles County Highway Safety Commission (HSC)

Bicycles & Pedestrians

Public Works is responsible for the development, and maintenance of the County's bikeway system and the implementation of the County of Los Angeles Bicycle Master Plan adopted by the Board in 2012. The Master Plan will more than quadruple the amount of bikeways from 144 miles to over 800 miles within 20 years. Through Federal, State, and local grant programs, the County was awarded over \$30 million for bicycle and pedestrian projects from the State Active Transportation Program and other Metro grant programs since 2015.

Public Transit

Public Works provides local fixed-route transit service to over 3.3 million riders annually and paratransit (dial-a-ride) service in unincorporated areas to meet the needs of community residents, providing access and intermodal transportation mobility and connectivity.

During the summer season, Public Works provides transportation to the Hollywood Bowl and area beaches. Other activities include the operation and maintenance of park-and-ride lots, bus stop shelter maintenance, and advertising programs. Transit services are primarily financed with the County's share of Proposition A Local Return, local sales tax funds.

Active Transportation & Healthy Communities

The Department of Public Health identified communities throughout the County with a need for improved health outcomes. In collaboration with other County departments, Public Works' Transportation Core Service Area has a key role in helping to address this challenge through transportation programs and improvements that promote walking, bicycling, transit use, and safety. These active transportation programs increase the public's transportation choices, provide improved connections to transit hubs and destination centers, and improve health outcomes by promoting healthy lifestyles, reducing reliance on automobile travel, and reducing greenhouse gas emissions.

Traffic Safety and Vision Zero

In collaboration with the Department of Public Health and with the support of other County departments, Public Works is establishing an Action Plan to carry out the County's Vision Zero Goal, an effort to reduce and eventually, eliminate traffic-related fatalities and severe injuries on County roadways. This multifaceted initiative relies on a combination of strategies relating to engineering, enforcement, education and evaluation of data and outcomes to continually strive toward zero traffic fatalities.

Aviation

Public Works oversees the operation, maintenance, and development of five County-owned general aviation airports:

- San Gabriel Valley Airport in the City of El Monte (SD1)
- Compton/Woodley Airport in Compton (SD2)
- Whiteman Airport in Pacoima (SD3)
- Brackett Field Airport in the City of La Verne (SD5)
- General William J. Fox Airfield in Lancaster (SD5)

Altogether the County-owned airports encompass 1,750 acres and nearly 6 miles of runway, are home to over 1,800 general aviation aircraft and over 55 privately-owned aviation businesses, and accommodate just over 330,000 aircraft takeoffs and landings each year. These airports are a vital part of the nation's integrated transportation system and also play a vital role in regional and local area emergency response.

\$200+ Million spent annually on street and road operation, maintenance and safety programs

KEY ISSUES/CHALLENGES

• **Infrastructure State of Good Repair**

- Funding for County Transportation Improvement Program projects, and operations and maintenance efforts, primarily comes from:
 - Gas tax funds
 - Senate Bill 1 (Beall) provides significant new revenues for road repair and rehabilitation, maintenance, and safety programs beginning in FY 2017–18
 - Local sales tax measures (Proposition C, Measure R and Measure M)
 - Federal, state, and regional grant programs
- Emphasis on rapid rollout of SB 1 – funded projects that the public can see to demonstrate the benefits of the new transportation tax dollars.
- Thoughtful allocation of transportation funds to ensure an effective balance between infrastructure repair needs and ongoing operation, maintenance, and safety programs that promote livability and quality of life of our communities.
- Capitalizing on new sub-regional Measure M funding to promote mobility and active transportation in and around unincorporated area communities.
- Proper planning and implementation cannot always account for natural disasters, as the devastation of the Woolsey Fire has had a significant impact on County transportation infrastructure.
 - The fire, which spread from neighboring Ventura County, laid a path of devastation that saw the destruction of thousands of structures and hundreds of homes and also damaged critical transportation infrastructure. The fire damaged or destroyed 3 bridges, countless miles of guardrail, timber and rail walls for embankment support, as well as roadside drains that are critical to flood control during storm events.
 - Although the impact to the County's transportation infrastructure pales in comparison to the devastation and loss felt by our constituents and property owners, the impact to recovery efforts for transportation infrastructure has forced a significant re-deployment of resources and personnel.
 - Dozens of employees from every area within Public Works have been deployed in various capacities to assist with the recovery efforts, from providing guidance for potential mudflow events, emergency openings of roadways, to the design and implementation of emergency repairs for other critical infrastructure, and for the coordination of multi-agency efforts to ensure uniform and consistent recovery operations.

• **Providing For the Needs of All Transportation System Users**

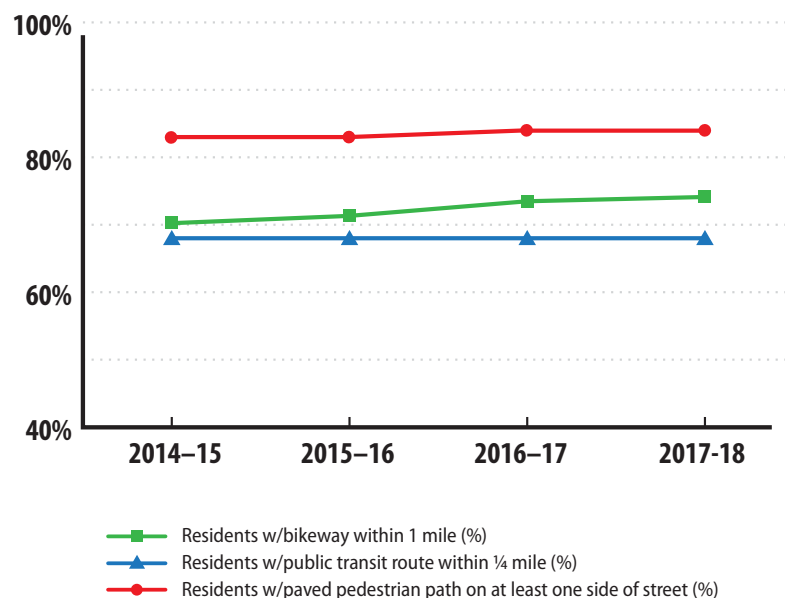

- The duty to provide ongoing adequate investment in state of good repair for the aging bridge, pavement, and sidewalk infrastructure and safety and congestion management.
- Ensure that Public Works address community values, safety, and compliance which encompasses the consistent implementation of multimodal and sustainable transportation plans, policies, and projects.
- Create a culture of innovation that promotes economic, environmental, and community-based sustainable maintenance and management of public infrastructure, including the County's urban forest.
- Improve customer service, transparency, and communication through enhanced and sustainable programs, systems, and initiatives.

9 Sub-regions/Councils of Government in the County (Arroyo Verdugo, Central Los Angeles, Gateway Cities, Las Virgenes/Malibu, North Los Angeles County, San Fernando Valley, San Gabriel Valley, South Bay Cities, and Westside Cities)

KEY PRIORITIES

- **Infrastructure Asset Management**
 - Improve, enhance and maintain pavement, bridges, sidewalks, traffic control devices, street lighting, and roadway infrastructure in a state of good repair
 - Develop an asset management plan to initiate planning efforts for long-term improvements, ongoing operations, and resilience from natural disasters.
- **Innovation, Planning, and Sustainability**
 - Develop the framework for innovative, active, and sustainable transportation planning.
 - Implement sustainable transportation planning policies that promote transit use, reduce car dependency, reduce greenhouse gases, and that support development of affordable housing.
- **Vision Zero and Transportation Safety**
 - Begin implementation of Public Works' Vision Zero Action Plan.
 - Consistently monitor the safety of the transportation network and deliver traffic safety projects and enhancements for all users.
- **Sustainability of Transportation Funding**
 - Identify and implement cost effective methods for maximizing available funding sources for the delivery of services, projects, and programs.
 - Promote integration of non-traditional funding sources and cost-sharing strategies in the development of project budgets.

Multi-Modal Transportation

KEY PRIORITY STATUS (FIRST QUARTER: JULY – SEPTEMBER 2019)

Priority: Infrastructure Asset Management

1. Obtained Board approval of the sale and license agreements with Southern California Edison (SCE) for acquisition of 39,000 street lights serving unincorporated County areas in May 2019. Continued to investigate and evaluate financing options for acquisition and LED conversion of the streetlights.
2. Continued collaboration with the County's Homeless Initiative, Public Health, Regional Planning, Sheriff's Department, and County Counsel to implement the recommendations outlined in previous reports to establish a pilot, focused on sustainable solutions to assist individuals living in vehicles in the unincorporated West Rancho Dominguez, Rosewood, and Willowbrook communities.

The pilot will include solutions related to the following three areas of concern: (1) the proper disposal of unclaimed, dilapidated, and hazardous Recreational Vehicles (RV); (2) minimizing improper disposal of RV waste; and (3) the creation of safe parking program.
3. Supported the emergency response and recovery efforts for Fire Disaster Areas.

Helped organize multi-agency efforts with local, state, and federal jurisdictions and partner agencies to ensure recovery operations were uniform and coordinated.

Coordinated efforts for disaster recovery funding available through Federal Highway Administration, Federal Emergency Management Agency, (FEMA) and California Office of Emergency Services. The total damages to Public Works infrastructure related to fires impacting the County and subsequent rain storms is currently estimated at \$180 million, which includes \$75 million related to transportation infrastructure.
4. Managed the infrastructure recovery plan for the County's critical transportation infrastructure, including the development of projects for the replacement of guardrails, rail and timber walls, and permanent restoration of critical bridge structures that burned in the Woolsey Fire.
5. Continued construction along New York Drive in the unincorporated Altadena community. This multi-benefit project includes reconstruction of the existing roadway, construction of new sidewalk, and drainage improvements. The project also includes intersection improvements and traffic signal upgrades.

Priority: Innovation, Planning, and Sustainability

1. Received funding for the Vermont Manchester Transit Priority Affordable Housing and Sustainable Communities Project. The project includes 180 affordable housing units and \$6 million of transportation improvements in the City of Los Angeles and the unincorporated County.
2. Collaborated with County departments and affordable housing developers to begin scoping improvements and preparing applications for the Affordable Housing Sustainable Communities (AHSC) grant program, Round 5. Public Works presented at the AHSC Developer Forum to encourage affordable housing developers to partner with the County to build new affordable housing in the Unincorporated County. At the request of the Chief Executive Office, Public Works hosted a workshop for the Cities of Pasadena and Pomona, along with 2 developers to share lessons learned and benefits of the AHSC program. Public Works and the Chief Executive Office also worked to establish partnerships with Metro and the City of Los Angeles Department of Transportation for future AHSC projects.

Priority: Innovation, Planning, and Sustainability (Continued)

3. Continued development of the Rosemead Boulevard Complete Streets Project through collaboration with stakeholders on development of the Plan.

Continued efforts to pursue an interim project for Rosemead Boulevard, consistent with the Emerald Necklace Bikeway prioritized projects.

Reinitiated efforts to implement two other Emerald Necklace Bikeway projects, including a bridge over San Jose Creek to connect the existing San Jose Creek Bike path with the Duck Farm along the San Gabriel River.
4. Continued collaboration with the San Gabriel Valley Council of Governments on planning efforts for a future San Gabriel Valley Greenway Network.
5. Conducted outreach to obtain public input from the 20 East San Gabriel Valley unincorporated communities, for the East San Gabriel Valley Active Transportation Plan.
6. Continued construction of the Slauson Avenue Traffic Signal Synchronization Program (TSSP) from Shenandoah Avenue to Rimpau Boulevard in the unincorporated County areas of Ladera Heights, Baldwin Hills, and Windsor Hills, as well as the City of Culver City.
7. Continued the design of 12 future TSSP projects involving 287 intersections in the cities of Baldwin Park, Bellflower, Carson, Commerce, Compton, Culver City, Downey, El Monte, El Segundo, Gardena, Hawthorne, Industry, Inglewood, Irwindale, Lakewood, La Mirada, Lawndale, Long Beach, Los Angeles, Lynwood, Montebello, Pico Rivera, Pomona, Rosemead, Santa Fe Springs, South Gate, Temple City, Walnut, Whittier. These projects have an estimated cost of \$31 million.
8. Continued design of the Gateway Cities Fiber Optic Communications and Closed-Circuit Television Camera (CCTV) Project which will install fiber optic communications and 13 CCTV cameras at key intersections in the Gateway Cities area. The Project will establish fiber optic communication connections with the Cities of Downey, Lynwood, Norwalk, Santa Fe Springs, and South Gate to enable enhanced traffic coordination.
9. Advertised the South Bay Arterial Performance Measurement Project, award pending. The project will install travel time devices, wireless magnetometers and radio communications along Main Street, Broadway, and Normandie Avenue between the I-105 and SR-91 Freeways.
10. Responded to insurance and enforcement related inquiries from applicants for a program regulating the deployment of shared e-scooter and e-bikes in unincorporated County areas. Continued coordination with other County departments to determine next steps since applicants have not completed the entire permit process.

Priority: Vision Zero and Transportation Safety

1. Completed the Vision Zero Action Plan which includes results of a collision data analysis, identifies unincorporated roadways experiencing patterns of fatal and severe injury collisions, and includes over 60 actions aimed at enhancing traffic safety.
2. Attended various community events to promote the Vision Zero Action Plan and solicit feedback.
3. Developed draft Vision Zero implementation partnership structure.
4. Scoped various transportation safety elements along Vision Zero corridors for inclusion in future Road Maintenance and Rehabilitation Account funded projects.
5. Began development of transportation safety project prioritization method that considers project delivery through a Vision Zero lens.
6. Currently developing funding and implementation plans for traffic safety programs.

Priority: Sustainability of Transportation Funding

1. Completed an initial analysis of the health and sustainability of Transportation Funding.
2. Implemented short term steps to reduce the potential for future budget shortfalls by reducing expenditures and by increasing available reimbursement for disaster repairs.
3. Developed medium and long-term cost cutting measures for future fiscal years.
4. Received approval from Metro for \$34.3 million in Measure M funding over the next 3 years for 16 projects within the Las Virgenes-Malibu, North County, San Gabriel Valley, and South Bay sub-regions.

Environmental Services

"We lead, inspire, and support our communities toward a healthy, waste free future."

MAJOR PROGRAMS/SERVICES

Public Works is the lead County agency responsible for advising the Board of Supervisors on waste management issues and manages numerous Countywide, regional, and unincorporated area programs that monitor, regulate, and manage the collection, treatment and disposal of solid and hazardous waste. Los Angeles County has the most complex solid-waste management system in the nation, comprised of 10 municipal solid waste landfills, 1 waste-to-energy facility, 12 inert-waste landfills, over 70 materials recovery, transfer/processing and organics management facilities, and over 100 permitted waste haulers.

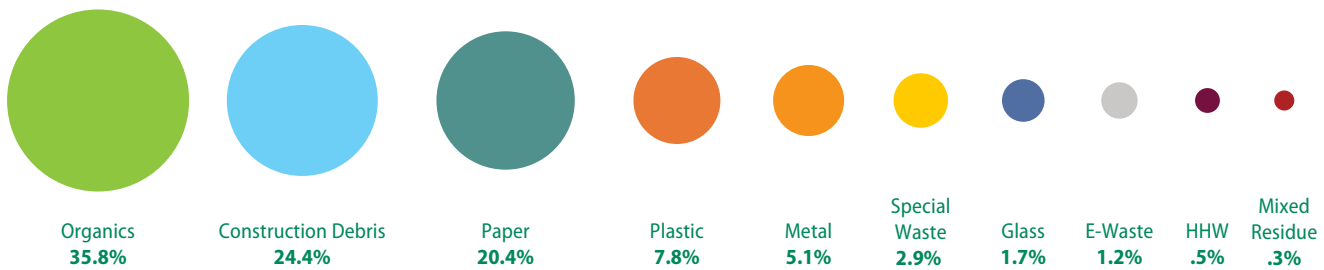

Waste Collection and Disposal

Public Works provides trash collection service for approximately 1.1 million unincorporated area residents and nearly 20,000 businesses through comprehensive waste collection franchises and Garbage Disposal District systems. In the Antelope Valley, residential trash collection services are provided to approximately 100,000 residents through an open-market competitive system. Each year, about 2.8 million tons of solid waste is generated in the unincorporated areas of Los Angeles County of which approximately 0.9 million tons is disposed of at landfills.

Waste Diversion Programs

In 2014 the County Board of Supervisors adopted the Roadmap to a Sustainable Waste Management Future (Roadmap). The Roadmap lays out a general framework for the strategies and initiatives that the County can implement to decrease reliance on landfills by maximizing the recovery of products, materials, and energy from waste that would otherwise be disposed. The Roadmap includes recommended strategies, initiatives, and disposal reduction targets to achieve 95 percent diversion by 2045.

County Waste Stream

Public Works manages numerous unincorporated area and Countywide award-winning solid waste reduction and recycling programs, including the Countywide Household Hazardous and Electronic Waste (HHW/E-Waste) Management Program, which collected and managed over 7,219 tons of HHW/E-Waste in FY 2018-19. The HHW/E-Waste Program is being expanded by developing Reuse Centers at the two County-operated permanent collection centers. Other key programs include:

- Environmental Education & School Outreach (Environmental Defenders and Generation Earth Programs)
- Smart Gardening Program
- Smart Business Recycling Program
- Construction & Demolition Debris Recycling Program
- Waste Tire Recycling Program
- Mattress Recycling Program

Integrated Waste Management Planning

Public Works is responsible for ensuring that the unincorporated areas comply with waste diversion mandates, preparing and implementing the Countywide Integrated Waste Management Plan, and ensuring long-term disposal capacity for the County and its 88 cities in accordance with the California Integrated Waste Management Act of 1989 (AB 939). Public Works serves as chair of the County Integrated Waste Management Task Force (Task Force).

The Task Force is comprised of representatives from local government, the solid waste management and recycling industry, members of the general public, the business sector, and environmental groups who collaboratively plan the County's solid waste management needs.

Industrial Waste Control Program

Public Works provides industrial waste services for the unincorporated areas of the County and 37 contract cities, including inspection of 8,000 permitted industrial waste pretreatment systems, and enforcement against illegal, harmful industrial waste discharges to the sanitary sewer system and surface waters.

2017 Waste Generation in Unincorporated County:

- Population: **1.1 million**
- Waste generation: **2.9 million tons**
- Equivalent to **14.6 pounds per person per day**

2017 Waste Disposal in Unincorporated County:

- **0.9 million tons** disposed in landfills
- Equivalent to **4.7 pounds per person per day**

7,219 tons

Household Hazardous Waste/E-Waste Collected

50,989 gallons

Used-motor oil collected at
County used-motor oil Permanent centers
FY 2018-19

12.9 tons

Batteries collected at
designated County Libraries
FY 2018-19

Underground Storage Tank Program

Public Works permits, monitors, and inspects underground storage tanks within the unincorporated areas of the County and 77 cities for compliance with local, state, and Federal requirements. Currently, Public Works is monitoring over 4,400 underground tank systems in the County to protect public health and safety, as well as groundwater.

Industrial/Commercial Facilities Program

Public Works inspects and issues certificates of inspection for over 3,100 facilities within the unincorporated areas to implement Best Management Practices to protect stormwater and our waterways.

KEY ISSUES/CHALLENGES

- Residents and businesses in Los Angeles County currently generate 30.0 million tons of solid waste per year, of which 2.9 million originates from unincorporated areas. The sustainable management of this waste is a major challenge, which involves waste collection, outreach and education, maximizing waste reduction and recycling, development of alternatives to landfills, and ensuring adequate disposal capacity for the waste that cannot be recycled or otherwise diverted. Waste disposed at landfills is also a major source of greenhouse gases that contributes to climate change.
- There is limited potential for new in-County landfill capacity to meet the long-term disposal needs of Los Angeles County.
- Industrial waste discharges and the underground storage of hazardous substances, if not properly managed, can lead to surface and groundwater contamination which impacts health and safety and the environment.
- In November 2018, the Woolsey Fire disaster burned 96,949 acres of land in the cities and unincorporated communities of Agoura Hills, Calabasas, Hidden Hills, Los Angeles, Malibu, and Westlake Village impacting public health and safety, personal and private property, infrastructure and watersheds. Public Works continues to lead debris removal efforts, which include a State-sponsored and a local debris removal program which assist property owners responsibly clear their properties of fire debris and prepare for rebuilding.
- Aging infrastructure and varying management practices has reduced the effectiveness and reliability of the sewer infrastructure.

KEY PRIORITIES

- **Sustainable waste management and recycling programs and services**
 - Implement Strategies and Initiatives in the Roadmap to a Sustainable Waste Management Future
 - Implement the County's Roadmap to a Sustainable Waste Management Future to decrease reliance on landfills and achieve zero waste by 2045, with respect to the following three focus areas:
 - County Unincorporated Communities
 - Regional Countywide
 - County Operations
 - Continue to support the County's Homelessness Initiative by implementing the Food Donation Recovery and Outreach Program (Food DROP) to address the issues of food insecurity and organic waste management.
 - Implement a new ordinance limiting the use of single-use plastic straws.
 - Mass Debris Removal
 - Woolsey Fire Recovery Efforts
 - Lead the Environmental Branch of the County's recovery efforts.
 - Manage debris removal efforts, including the State-sponsored and local debris removal programs.
 - Conduct outreach to property owners to encourage 100 percent participation and compliance.
 - Ensure maximum cost recovery, including insurance proceeds and reimbursement from FEMA and/or CalOES.
 - Illegal Dumping
 - Illegal dumping continues to impact roads, streets, and alleys in the County unincorporated areas. As part of its efforts to discourage illegal dumping and encourage residents to report it for cleanup when they see it, Public Works continues to conduct education and outreach campaigns which includes media outreach, bus shelter advertising, and other efforts.
- **Reduce carbon fuel emissions generated by Public Works Fleet**
 - Clean Fuel Fleet
 - Incorporate clean fuel vehicles, such as electric and CNG into the Public Works Fleet.
- **Maintain the condition of the sewer infrastructure, meet discharge requirements, and continue elimination of the sanitary sewer overflows**
 - Carry out the Sewer System Management Plan (SSMP)
 - Pursuant to the State Water Resources Control Board (SWRCB) Order No. 2006-003-DWQ, Public Works is required to present the SSMP to the Board of Supervisors for readoption every five years following the date of its original approval or whenever there is a significant change in the document. The SSMP was initially adopted by the Board on May 6, 2008. The Board recertified the SSMP on June 4, 2013 and most recently on November 7, 2018. The SSMP, and the associated audit that we perform, is put in place to ensure that the occurrence of sanitary sewer overflow (SSO) events are prevented or significantly minimized.
 - Address problematic sewerage in identified communities
 - Ensure the sanitary sewer collection system facilities are properly operated, maintained, and managed to reduce frequency and severity of SSO events and their potential impacts on public health, safety, and the environment while meeting applicable regulations and laws.

2018 Solid Waste Quantities in Los Angeles County

Generation = Diversion + Disposal

Amount of trash generated

**30 million
tons per year**

Amount of trash diverted

**19.5 million
tons per year**

Amount of trash disposed

**10.5 million
tons per year**

KEY PRIORITY STATUS (FIRST QUARTER: JULY – SEPTEMBER 2019)

Priority: Sustainable waste management and recycling programs and services

Roadmap to a Sustainable Waste Management Future

1. Public Works conducted a presentation on the Departmental Recycling Program to the Department of Public Health at their August meeting, providing guidance and offering technical assistance on how to start or enhance recycling programs. Public Works also conducted beverage container recycling education and outreach to local residents at Dalton Park. More than 30 beverage recycling container bins have been distributed to various County facilities during this quarter.
2. Continued researching, developing, and implementing Roadmap initiatives focusing on organic waste management, illegal dumping, and recycling for:

County Unincorporated Communities (CUC)

Public Works continues to enroll local residents in the Vanguard Community Garden in the unincorporated Willowbrook area. The community garden covers 2 acres of communal plots for residents to grow their own produce.

Regional/Countywide

Public Works continued administering the Smart Gardening Program. The Program hosts Beginner's Workshops with topics on backyard and worm composting, water-wise gardening, grasscycling, and edible gardening. Advanced Workshops cover organic gardening, drought-tolerant landscaping, and integrated pest management.

County Operations

The Scrape Your Plate Program has collected over 33,000 pounds of food waste since the program began in Fall 2017.

In August 2019, the County of Los Angeles Quality and Productivity Commission awarded a Top Ten Productivity and Quality Award to Public Works' Food Donation and Food Waste Recycling Initiative, which is comprised of the Food DROP program, the Commercial Food Waste Collection Pilot, and the Scrape Your Plate Program. The Initiative provides significant environmental and social benefits for the County, recovering almost 30 tons of edible food to feed the 1 in 7 people in the County who are food insecure and diverting over 1,500 tons of food waste from landfill disposal. The Initiative has prevented 900 tons of carbon dioxide equivalent of emissions, offsetting the annual emissions of 200 passenger vehicles or 20 homes. The Commission conducted a site visit at Public Works Headquarters on August 21, 2019, to see the Scrape Your Plate program in action and learn more about how Public Works is leading by example to inspire other jurisdictions and County entities to implement food waste reduction and recycling programs.

Outreach and Education

In continued support of the County's Homelessness Initiative, Public Works continued coordinating site visits to large food generating businesses in County Unincorporated Communities and food recovery agencies in Los Angeles County to increase participation in Food DROP. To date, over 50 of the businesses visited expressed interest in participating in the food donation program.

Priority: Sustainable waste management and recycling programs and services (Continue)

Outreach and Education (Continue)

A series of campaign events continue to be held throughout Los Angeles County in 2019 to educate residents and businesses about the Food DROP program and encourage participation. To date, we have redistributed over 38,000 pounds of food to 540 families. On Saturday, July 27, 2019, Public Works hosted an event in partnership with Meet Each Need with Dignity (MEND). Next quarter Public Works is planning to conduct a food distribution event at Bassett Park in La Puente. Through the media outreach campaign with ESPNLA 570AM, Los Angeles County residents and businesses were encouraged to participate in the “Day Without Hunger” events and reduce food waste. The campaign has garnered millions of impressions and has increased the average attendance by over 50 percent at the non-profit organizations during the “Day Without Hunger” events. To further encourage and educate residents of environmental initiatives, Public Works is also running Illegal Dumping and Beverage Container Recycling campaigns in partnership with the Los Angeles Dodgers and iHeart Media. Through the two campaigns, we have been able to participate in Dodger Days community events allowing us to reach youth athletes and their families. In addition, Public Works participated in over 40 community events this quarter to educate residents on programs such as recycling, Bring Your Own (to encourage reuse), proper disposal of HHW/E-Waste, and general waste reduction.

Waste Characterization Study for Los Angeles County Unincorporated Areas

Public Works awarded a Waste Characterization Study contract for the County Unincorporated Areas to Cascadia Consulting Group, Inc. The findings of the study will help determine where to target future waste reduction efforts. During this quarter, the project team and Public Works held a kickoff meeting and began working on various tasks to complete the study.

Commercial Food Waste Collection Pilot Program

Under the Commercial Food Waste Collection Pilot, participating waste haulers collect food waste from businesses which is sent to the Puente Hills Material Recovery Facility for pre-processing and is eventually anaerobically digested at the County Sanitation Districts’ Joint Water Pollution Control Plant in Carson, CA. The Pilot began in July 2016 and was extended through November 2019. To date, the project has successfully diverted 1,572 tons of food waste with an average diversion rate of 52 tons of food waste each month.

Countywide Organic Waste Management

1. In anticipation of the impending SB 1383 organic waste disposal reduction regulations, Public Works continues to conduct strategic planning for SB 1383 compliance, including analyzing options for the sustainable collection of organic waste and the development of organic waste recycling infrastructure.

Mass Debris Management

1. Woolsey Fire Recovery

Public Works continued managing debris removal and outreach for the Woolsey Fire Recovery efforts. The total number of parcels affected by the fire was 1,570, and 1,376 properties submitted debris removal applications. The remaining properties were either deemed ineligible or non-responsive or were exempt from the debris removal program.

By the end of the quarter 938 properties submitted applications to participate in the Consolidated Debris removal program operated by CalOES. Of those, 826 parcels required debris removal and were cleared by the State. In addition, 438 properties submitted applications to participate in the Local Program to conduct their own debris removal, and 300 of those parcels were cleared by the property owners. A total of 1,126 parcels are now eligible for rebuilding.

The Consolidated Debris removal program concluded on July 31, 2019. The Local Program is scheduled to end September 30, 2019.

Priority: Sustainable waste management and recycling programs and services (Continue)

Illegal Dumping

1. In response to a Motion approved by the Board of Supervisors on August 6, 2019, Public Works continued to work towards addressing illegal dumping affecting the unincorporated communities of East Los Angeles, with immediate attention to the neighborhoods of Whiteside Industrial Zone; Whittier Boulevard, Cesar E. Chavez Avenue, and City Terrace Drive commercial corridors; Olympic Boulevard along the Union Pacific railroad right-of-way; and the Saybrook residential area. Public Works is investigating the possibility of amending waste collection contracts to provide additional collection services.
2. Public Works continued managing the trash collection pilot program, extended through June 30, 2020, in the Willowbrook and Rosewood areas where dumpsters are temporarily placed one day per week for residents living in vehicles. Public Works staff conducts weekly field monitoring on these areas.
3. Public Works began meeting with the City of Los Angeles to discuss opportunities to collaborate on enhanced illegal dumping enforcement and outreach. The first meeting took place on July 16, 2019 to discuss opportunities to collaborate on outreach and the second meeting which occurred on August 15, 2019 included representatives from, City of Los Angeles Environmental Enforcement Unit, County District Attorneys, County Sheriff, and County Public Works.

Priority: Reduce carbon fuel generated by Public Works Fleet

Clean fuel fleet

1. One plug-in hybrid electric vehicle and three CNG street sweepers were added to the Public Works fleet to continue reducing carbon dioxide (CO₂) emissions.

Priority: Maintain the condition of the sewer infrastructure, meet discharge requirements, and continue elimination of the sanitary sewer overflows

Carry out the Sewer System Management Plan (SSMP)

1. Public Works continues to carry out the SSMP without any difficulty, and there were no violation notices issued by the SWRCB during this quarter.

Address problematic sewerage in identified communities

1. The proposed Balfour pump station pilot project is still being refined to address the drainage, sewerage and road deficiencies

Public Buildings

"We design and deliver high performing buildings and facilities for people and programs to thrive."

Campus Kilpatrick

In 2018-19:

- Completed **29** new or renovated County buildings valued at **nearly \$178 million**

MAJOR PROGRAMS/SERVICES

Programs

Public Works' Public Buildings Core Service Area strives to be the Builder of Choice by providing project management services for Public Works and other agency's infrastructure projects and the County's Capital Projects. This includes the renovation of existing building facilities and infrastructure, and the master planning, programming and construction of new building facilities for many County departments including Animal Care and Control, Beaches and Harbors, Fire, Health Services, Mental Health, Parks and Recreation, Child Support Services, District Attorney, Probation, Public Health, Public Libraries, and Sheriff.

Currently, Public Works manages approximately 370 active projects with a total project value of over \$4 billion.

Public Works utilizes a variety of methods to deliver projects, including design-build, job order contracts, traditional design-bid-build, best value, and developer project delivery. Public Works works in conjunction with the Board of Supervisors office, Chief Executive Office, and the client departments to define project parameters, and to select the project delivery method that best enables the County to meet the established project goals and objectives.

County Capital Project budgets also includes the allocation of one percent of the design and construction cost for each project to the Civic Arts Program for the integration of high-quality civic art into the County's capital building projects per the County's Civic Art Policy adopted by the Board of Supervisors in 2008, aimed at improving the physical and cultural environment and the quality of life of County residents.

The County's Homeless Initiative

The Homeless Initiative is designed to generate a coordinated set of County strategies to reduce homelessness through an intensive, inclusive planning process in six areas: prevention of homelessness, subsidized housing, increased income, case management and support services; creation of a coordinated system; and an increase in affordable housing. This past year, Public Works has worked with the Health Agency to develop plans at four County locations to construct Residential Treatment Centers with a total of number of 240 beds to support and advance this initiative. In addition, we are designing Recuperative Care Centers into the master plans at Harbor-UCLA, LAC+USC, Olive View-UCLA, and Rancho Los Amigos Medical Centers.

Public Buildings:

- Manages about **370 active projects with a total project value of over \$4 billion**
- Designs and delivers high-performing, resilient County infrastructure

KEY ISSUES/CHALLENGES

- **Project Management Excellence**
 - Continually striving for project management excellence is crucial for consistently delivering strong business results which:
 - Lowers cost
 - Increases efficiencies
 - Improves customer and stakeholder satisfaction
 - Fosters a competitive edge
- **Customer Expectations**
 - Understanding and meeting customer expectations enables Public Works to provide complete solutions to local needs.
- **Lead the Industry**
 - Continuing to set high standards for service delivery and producing superior results will position Public Works as an industry leader.
 - A trusted network of resources for information sharing and problem-solving:
 - Promotes efficiencies
 - Develops innovative solutions
 - Optimizes resources

Santa Anita Dam Spillway Modification Project

KEY PRIORITIES

- **Project Delivery**
 - Ensure Public Works infrastructure delivery model is modern and efficient.
- **Project Management Results**
 - Deliver projects to clients within project budget.
- **Process Improvements**
 - Promote transparency and improve business performance through process improvements.
- **Community Awareness**
 - Develop and install methods to capture and address community needs in all projects.
- **Industry Relations**
 - Build industry relations by facilitating collaborative problem solving.
 - Provide high-quality, industry leading service results.

KEY PRIORITY STATUS (FIRST QUARTER: JULY – SEPTEMBER 2019)

Priority: Project Delivery

1. As we await authorization to implement the new project management centric project delivery approach for Public Works infrastructure projects, we continue to develop processes and procedures to ensure successful implementation.

Priority: Project Management Results

1. Performance metrics have been standardized and data gathering is taking place to consistently and accurately measure success across capital projects and infrastructure projects.
2. From July 2018 to now, all 29 capital projects have been delivered within established budgets.

Priority: Process Improvements

1. Implemented previously identified opportunities for process improvements resulting in a 4 percent increase in the timely payment of invoices since March 2019.
 - Capital projects processed invoices timely 99 percent of the time.
 - A quad sheet to track the timeliness of invoice processing for infrastructure projects has been developed.

Priority: Community Awareness

1. A process has been developed to ensure that community comments have been solicited for each capital project. Currently developing a comprehensive process to ensure community input is incorporated into all infrastructure projects.

Priority: Industry Relations

1. The Regional Construction Forum will meet in the second quarter to finalize the group's Purpose, Goals, and Organization.

Development Services

"We help people build their dreams and ensure safe and healthy homes and communities."

3,800 Subdivision improvement plans reviewed

18,000 building permits valued at \$1.5 billion issued annually

MAJOR PROGRAMS/SERVICES

Public Works' Development Services Core Service Area provides land development and permitting services and code enforcement programs and services throughout the County.

Land Development

Public Works works in partnership with the Department of Regional Planning to deliver responsive land development, California Environmental Quality Act document reviews, entitlements, permitting, and inspection services and streamlined permit approvals for customers by deploying a new online enterprise plan checking system. About 3,800 subdivision-related plan reviews are performed and 180 new subdivision maps are recorded each year. In addition, Public Works provides land development and County Surveyor services for 62 cities through contract city services.

Permits and Inspection

Public Works is also responsible for the enforcement of building regulations for public and private buildings and operates out of ten regional permit offices, providing building permits and inspection services. An average of 18,000 building permits with a valuation of about \$1.5 billion are issued annually and made available online via Public Works' interactive "Building Permit Viewer" website. In addition to online permit services, Public Works provides building official services for 14 cities through contract city services.

In addition to building permits, Public Works also provides permit and inspection services for general construction, transportation, and filming activities within unincorporated County public rights of way and miscellaneous activities affecting Los Angeles County Flood Control District (LACFCD) facilities. Public Works also provides permit and inspection services for activities in city public rights-of-way for several contracts cities. About 24,000 permits are processed annually.

Public Works also provides confined space underground inspection services for new LACFCD facilities.

Code Enforcement and Property Rehabilitation Program

Public Works performs code enforcement activities related to property maintenance to improve public safety and quality of life in unincorporated communities. The program is operated on a complaint basis to investigate and resolve public nuisance, unsightly property conditions or unpermitted construction issues within a community. Each year, Public Works processes about 2,200 code enforcements cases, 1,300 property rehabilitation cases, and 700 Nuisance Abatement Team (NAT) cases. The NAT cases typically include County regulation violations enforced by the Departments of Regional Planning, Health Services, Fire, and Animal Control and require the assistance of multiagency Task Force, including the County law enforcement and District Attorney's Office for enforcement actions.

In addition, Public Works performs code enforcement activities related to public rights-of-way, on a complaint basis, to investigate and resolve unpermitted encroachments. Public Works also investigates illicit/undocumented connections to flood control district facilitates for resolution and proper documentation.

Graffiti Abatement

Public Works also administers the County's Graffiti Abatement Program, which is tasked with the removal of graffiti in and around public rights-of-way in the unincorporated County and flood control district facilities in the unincorporated County and cities. The Program also includes a youth education component regarding the consequences of engaging in graffiti vandalism. Public Works contractors remove approximately 8.5 million square feet of graffiti per year.

KEY ISSUES/CHALLENGES

- Expanding local economy and demand for building stock in the housing and business sectors.
- Stakeholder demand for multipurpose use of public infrastructure and the creation of public places/spaces within the community
- Modernizing the County General Plan to meet the needs and demands of multiple stakeholder groups, communities, and business interests.
- Public demand for transparent local e-Government services to keep pace with those available in the private sector commercial market place.
- Community blight and aging housing stock in older neighborhoods.

KEY PRIORITIES

- **Streamlined Permitting**
 - Foster a collaborative culture.
 - Create an online permit and inspection system.
 - Implement concierge services to guide businesses and home owners through the permitting process.
 - Create regional One-stop Centers.
- **Sustainable Communities**
 - Develop water conservation ordinance.
 - Implement cool roof ordinance.
 - Utilize Envision sustainability rating system.
 - Expand knowledge of latest technologies and developments.
- **Transparency**
 - Scan and publish development related documents.
 - Provide the public with access to basic plan and permit information.
- **Affordable Housing**
 - Reduce application to approval turnaround time for entitlements and permits.
 - Develop interactive and user-friendly website.

KEY PRIORITY STATUS (FIRST QUARTER: JULY – SEPTEMBER 2019)

Priority: Streamlined Permitting

1. *Woolsey Fire Rebuilding:*
 - Public Works is providing expedited plan approval, permitting, and inspection services for those affected by the Woolsey Fire.
 - Public Works established a Road to Rebuilding website outlining the essential steps in the cleanup and rebuilding process.
 - Since March 2019, one-on-one rebuilding workshop sessions have been held for homeowners in the unincorporated County. Approximately 200 property owners have attended. Eight building permits have been issued thus far.
 - Public Works continues working on developing a concierge service program for development projects.
2. *Newhall Ranch Developments:*
 - Public Works continues to work closely with FivePoint on the implementation of sustainability features such as Neighborhood Electric Vehicles (NEV) within the Ranch. Conducting bi-weekly project schedule meetings to keep project on track.

Priority: Sustainable Communities

1. Public Works continues working on a more sustainable development model by preparing to rate projects for sustainability and through new or updated ordinances that will require developers to design using sustainable techniques and materials resulting in sustainable developments.
 - Updated Sewer Plans and Sewer Area Study pages on our website.
2. Public Works continues to remove 100 percent of reported graffiti within 48 hours. This high level of service helped reduce blight in our communities. Approximately 2.2 million square feet of graffiti was removed this quarter. (July – September 2019)

Priority: Transparency

1. Public Works continues working on improving the Development Services website and online “how to” guides and provide basic plan and permit information, so the public can see past, present, and planned developments.

Priority: Affordable Housing

1. Public Works continues to provide expedited services for projects that have an affordable housing component or that in other ways provide affordable housing stock such as Accessory Dwelling Units (ADU) that deliver integrated services for people experiencing homelessness.

Emergency Management

"We maintain a highly trained and equipped workforce to respond to and recover from daily incidents, local emergencies, and major disasters."

50,000 annual calls for service → **24 Hour** Dispatch Center

MAJOR PROGRAMS/SERVICES

Public Works is responsible for a wide variety of critical infrastructure and services which directly support the people and economy of Los Angeles County. We must be prepared to respond to and mitigate disruptions due to any hazards including natural disasters, technology failures, violence, or epidemics. This mission requires a great deal of teamwork and communication to ensure a high state of readiness, efficient response, and strong resilience for Public Works and the communities we serve.

Emergency Management

Public Works assists the Office of Emergency Management with Countywide emergency planning and preparedness activities, is a member of the County Emergency Management Council, and also serves as lead of the Construction and Engineering Branch of the County Emergency Operations Center (CEOC). Public Works also operates and maintains a Department Operations Center (DOC) to manage local emergency response and to support County emergency operations during major emergencies and disasters. The Public Works DOC was extensively activated in 2018 for the Woolsey Fire and subsequent storm season.

Public Works Dispatch Center

Public Works operates a 24-hours-a-day Dispatch Center and hotline (1-800-675-HELP) and coordinates more than 50,000 service and emergency calls annually, including reports of graffiti, potholes, hazmat spills, water service disruption, illegal dumping, sewer overflows, damaged signs, and malfunctioning signals. The Dispatch Center also coordinates closely with Public Works field crews, law enforcement, and other safety responders. Road closures for County-maintained roads are posted to a website at: <https://pw.lacounty.gov/rmd/roadclosures> and traffic signal incidents are posted at <http://pw.lacounty.gov/OSD/TrafficSignalIncidents/>

County Building Evaluation Team

Public Works is tasked with evaluating the structural integrity of all County buildings. In partnership with the Chief Executive Office and Internal Services Department, a comprehensive emergency response plan has been developed that includes processes on the prioritization and evaluation of County buildings. Training has been conducted to ensure staff are familiar with the County Building Evaluation Team Plan.

Continuity of Operations Plan (COOP)

The COOP identifies the essential functions and processes that must be continued or resumed rapidly after a disruption. Public Works analyzed over 150 processes and prioritized their value to protect life and safety, property, and the environment. The COOP identifies the resources needed to restore these essential processes and ensure that the fundamental responsibilities of Public Works will be executed, during response to an emergency or disaster.

Woolsey Fire Recovery Effort

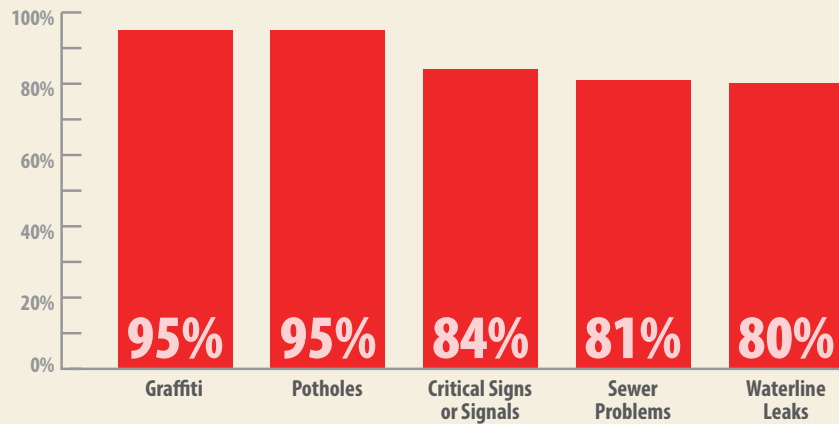

From November 8 through 21, 2018, the Woolsey Fire burned 96,949 acres of land in unincorporated County areas of the Santa Monica Mountains and in the Cities of Agoura Hills, Calabasas, Hidden Hills, Los Angeles, Malibu, and Westlake Village. Widespread damage occurred to private structures, public infrastructure, and watersheds. The Woolsey Fire damaged or destroyed over 1,000 structures in cities and unincorporated areas of Los Angeles County. Public Works was the lead in the Recovery Operations Section of the County's Recovery Coordinating Center and was integral in the response and recovery to the Woolsey Fire. Activities included damage assessments, debris removal, community engagement, and restoring essential infrastructure. Two bridges destroyed by the fire were recently rebuilt. An ongoing County audit of the response efforts are indicating that Public Works overall and its Emergency Management team performed exceptionally well and effectively adhered to County protocols and requirements of the National Incident Management System and State Emergency Management System. The emergency management consultant performing the study has indicated that in many areas Public Works is the model for other public works agencies to follow. Following the Woolsey Fire, Public Works, Fire, and Sheriff's Departments formed a Unified Command and coordinated closely to respond to storm events in the Woolsey Fire and Creek Fire burn areas. Public Works continues to implement projects to restore infrastructure and a system has been established to assist residents with streamlined processes for the rebuilding effort. As of this date, five building permits have been issued for the rebuilding of residential homes in County areas.

Financial Impact of Recent Disaster Events:

2004–05 Winter Rainstorms	\$111.2 M
2007 Wildfires	\$3.3 M
2008 Wildfires	\$0.5 M
2009 Station Fire	\$13.5 M
2010 Winter Rainstorms	\$51 M
2011 Wind Storms-San Gabriel Valley	\$5.4 M
2013 Powerhouse Fire	\$2.2 M
2014 Bouquet Canyon Road	\$2.7 M
2014 Winter Rainstorms	\$4.8 M
July 2015 Storm	\$5.6 M (Monthly)
2015 Winter Rainstorms	\$8.7 M
2016 Sand Fire (initial estimates)	\$14.5M
2017 Jan/Feb Storms	\$38.1M
2017 Creek Fire	\$1.6M
2018 Winter Storms	\$2.0M
2018 Woolsey Fire	\$38.5M

Dispatch Services

Completion rate, not adjusted to account for weather conditions within adopted time standard

KEY ISSUES/CHALLENGES

- To increase workforce awareness of the operational authority and resources to empower and enable efficient emergency response and recovery enterprise-wide.
- To increase and promote individual and community awareness of available Public Works resources and services for emergency management.
- To develop and strengthen strategic relationships and opportunities for collaboration to improve situational awareness, response efficiency, and recovery and preparedness in the region.
- To prepare for emerging environmental, social, health, and technology issues which present new challenges in emergency management

KEY PRIORITIES

- **Workforce Awareness**
 - Define and communicate scope of authority and roles and responsibilities.
 - Develop knowledge, skills, and abilities in response and recovery.
- **Community Awareness**
 - Educate and inform the community.
 - Expand knowledge of communities and their needs.
 - Ensure that response and recovery efforts address the safety and needs of people experiencing homelessness.
- **Strategic Relationships**
 - Strengthen collaborative partnerships with external agencies.
- **Emerging Issues**
 - Research and broaden knowledge base.
 - Plan and prepare for potential challenges of emerging threats and hazards.

KEY PRIORITY STATUS (FIRST QUARTER: JULY – SEPTEMBER 2019)

Priority: Workforce Awareness

1. Public Works continues to expand its goal of trained and certified Engineers, Architects and Building Inspectors in the Safety Assessment Program (SAP). There are currently about 240 SAP certified personnel at Public Works.
2. Public Works continues to participate in Federal Emergency Management Agency (FEMA) and California Governor's Office of Emergency Services Training.
3. Public Works updated the Department Emergency Plan, which outlines protocols to prepare employees to respond to a variety of incidents and workplace emergencies.
4. Public Works is pursuing significant improvements for the Department Operations Center (DOC). The improvements will include facility upgrades, improved power and communications reliability, a new video wall and additional audiovisual technology to allow for a stronger connectivity from the field to the DOC and further support services to the public.
5. Public Works completed a Continuity of Operations Plan (COOP). The COOP identifies the essential functions and processes that must be continued or resumed rapidly after a disruption. The planning effort is continuing, as further details and interdependencies are being analyzed and incorporated into the plan. COOP trainings and exercises are also being planned.

Priority: Community Awareness

1. Public Works developed an interactive web map for the debris flow hazards in post-fire areas. The tool has been extremely useful for first responders to plan storm response and potential evacuations, and a public version has allowed residents to personally assess hazards for their location.
2. Public Works continues its efforts in partnering with the Kagel Canyon community, which was greatly impacted by the 2017 Creek Fire, to assist in their preparedness and recovery process. Multi-Agency meetings are ongoing to assist and lead the community in their development of a disaster survival guide.
3. Public Works continues to participate in community emergency preparedness events throughout the County to directly communicate and share information with the public.

Priority: Strategic Relationships

1. Public Works, Fire, and Sheriff's Departments have formed a Unified Command and coordinated closely to respond to storm events in the Woolsey Fire and Creek Fire burn areas. The Unified Command was not activated during this quarter but remained engaged and prepared for upcoming events.
2. Public Works continues to partner with several County departments and other stakeholders to streamline processes pertaining to sewage overflows.
3. Public Works continues to be active on the Emergency Management Council (EMC). The EMC Subcommittee meets bi-monthly to discuss emergency management subjects relevant to the Operational Area, including plans, training and exercise opportunities.
4. Public Works participated in emergency coordination meetings for dam safety hazards with US Army Corps, California Department of Water Resources, Sheriff, Fire, and other partner agencies. Public Works also planned and hosted interagency table top and functional exercises for San Gabriel Dam.
5. Public Works engineers continue to participate as members of the Los Angeles County Fire Department California Task Force 2 Urban Search and Rescue (USAR) Team. During this quarter, work is also underway to add at least two additional Public Works employees to the USAR team as structure specialists.

Priority: Emerging Issues

1. Public Works continues to attend trainings, workshops and conferences to broaden the knowledge base and plan for potential challenges of emerging issues. During this quarter, Emergency Management personnel participated in extensive training on infrastructure protection to better assess vulnerabilities for threats and hazards. Additional training was conducted to more effectively include people experiencing homelessness in emergency planning.
2. Public Works continues to perform research and identifying best practices.
3. Public Works is coordinating with communities and response agencies to improve evacuation planning and communications in the Santa Monica Mountains.
4. Public Works continues to implement new GIS applications and web maps to improve readiness, track status, and interactively assess hazard information.
5. Public Works is expanding the equating of major planned projects as incidents. This provides a benefit of defining an Incident Command Structure and creating Incident Action Plans and other contingency plans. During this quarter, this was done for the Sativa Water Intertie Project and the Devil's Gate Dam Sediment Removal Project.

Business Outreach

Public Works' Business Outreach team focuses on supporting the County's community economic development through business-friendly contracting, procurement for products and services, opportunities for design, construction, maintenance, and operations of public infrastructure and capital projects.

Community benefits supported:

- Regional economic growth and workforce development
- Local business opportunities

Key issues to be addressed:

- Regional economic growth and development requiring support for small businesses and social enterprises
- Contracting best practices and risk management
- Need for the construction contracting community to stay current with emerging trends, innovative technologies for modern infrastructure, and new contracting requirements for bidding

Key priorities:

- Advance the Board's objectives of expanding business opportunities for Small and Medium-Size enterprises
- Support local workforce and job creation
- Strengthen controls to ensure compliance with contracting laws and regulations

Key efforts:

- Implement a robust business outreach program in collaboration with ISD and DCBA resulting in meeting and exceeding the Board's goal of 25% Local Small Business Enterprise utilization for two consecutive years
- Implement the Board's Local & Targeted Worker Hire Policy and guidelines for capital construction projects
- Establish strategic partnerships with professional organizations, industry coalitions, business community, and chambers of commerce
- Partner with DCBA to explore opportunities for Medium-Size Business Enterprise Programs
- Fully implemented all 33 Job Order Contract audit requirements

Administrative Services

Administrative Services provides support to Public Works operations and services to Los Angeles County businesses and residents including financial management; human resources; community and government relations, and workforce support to all Core Service Areas within Public Works. Services include fiscal oversight, budget/fund management, internal audit, recruitment, classification, personnel and payroll operations, employee relations, performance management, benefits and return to work, procurement and warehousing, employee training and professional development, compliance oversight for legally mandated programs, employee programs, grants, awards, legislation, strategic communications, and community engagement.

Community benefits supported:

- Outreach and engagement for various high-profile projects and programs
 - Provide job opportunities for various levels and skill sets.

Key issues to be addressed:

- Enhance community engagement to keep residents, business owners, and other stakeholders informed of upcoming projects and programs and obtain their valuable input.

Key priorities:

- Create a culture of outstanding public service by investing in employees, building in-house expertise, strengthening leadership development, creating permanent jobs, investing in tools, training, and technology, and enhancing the work environment.
 - Prepare for the current and future labor market demands by attracting, hiring, and retaining a highly-skilled workforce.
 - Shared responsibility with County departments to increase the number of families earning a living wage in LA County by providing job opportunities to disadvantaged job seekers, including former foster youth, veterans, homeless persons, reentry youth and adults, and dislocated workers.

- Enhanced Community Relations

Key efforts:

- Support Public Works' efforts to promote deeper employee engagement and a commitment to the highest level of customer service by leading an enterprise-wide workforce reinvestment strategy that will enhance employee recruitment, and retention, provide professional growth, and establish succession plans for all levels of management.
