APPENDIX A  ADVISORY WORKING GROUP MEMBERS

Given the complexity, regional impacts, and broad interests in sediment management, Public Works realized the need for creating a small advisory group to provide additional input and a broad perspective based on the members’ diverse experiences and key roles in the stakeholder community. The Flood Control District appreciates the time the members dedicated to this effort and the input provided. The Sediment Management Advisory Working Group was comprised of external members and members from within the Flood Control District / the County of Los Angeles Department of Public Works. The external members consisted of the following:
