FOR INTERNAL USE ONLY

Hello Victoria,

I'm following up with you regarding the phone call you had earlier today with Isabel regarding emergent work that our crews completed at 1810 Lomita Blvd. (car hit pole) on March 1st; and 1879 261st St. (damaged/broken OH secondary) on March 8th. I'm going to apply for the After the Fact permits via the SPATS system with LACO, but I wanted to follow through with your request to email you about the work. No plans are available for either project due to the work being emergent, and therefore not planned.

Please let me know if there's anything else you need from me on my end. Thank you!
