

Devil's Gate Reservoir Restoration Project 2022 Nesting Bird Log (Through September 30, 2022)

Nest ID	Species	Discovery Date	Discovery Stage	Location Description	Buffer Size (ft)	Updates	Update Status	Update Stage
ACWO-01	Acorn woodpecker	2/3/2022	Nest building	Cavity in will trunk. Approximately 20-feet above ground facing west.	50	3/21/2022	Possibly Inactive	No activity observed at nest cavity
						4/19/2022	Inactive	No activity observed
						5/19/2022	Active	Feeding young
						8/11/2022	Active	Nest building
						8/18/2022	Active	Incubating – possibly second brood
						9/30/22	Inactive	Presumed fledged based on timing.
CATH-01	California thrasher	2/8/2022	Incubating	In a Sambucus roughly 4-ft from the ground on an east facing branch.	100	3/9/2022	Inactive	Fledged
BUSH-01	Bushtit	2/9/2022	Nest building	18-ft up in an oak almost directly above road, in the canopy section, 3-ft from top of tree.	50	2/23/2022	Active	Nest building
						3/14/2022	Inactive	Possibly fledged
ANHU-01	Anna's hummingbird	2/14/2022	Incubating	20-ft above ground level in an oak directly above drainage.	50	6/1/2022	Inactive	Possibly fledged
CASJ-01	California scrub-jay	2/25/2022	Nest building	4-ft from the top of an oak tree, roughly in the center point. Approximately 12-ft above ground level.	65	3/22/2022	Active	Incubating
						4/12/2022	Inactive	Nest failed. Nest appears disheveled and transparent. Assume predated.
BUSH-02	Bushtit	2/28/2022	Nest building	About 10-ft above ground in the northeast quadrant of a large oak.	50	5/31/2022	Inactive	Possibly fledged. Nest is gone.
CASJ-02	California scrub-jay	2/28/2022	Nest building	12-ft from the ground in the high canopy of an elderberry. SW quadrant of tree.	65	3/29/2022	Inactive	Unable to locate nest – possibly incomplete nest-building effort.
EUCD-01	Eurasian collared-dove	3/1/2022	Nest building	15-ft above ground level in a coast live oak.	0	3/29/2022	Active	Feeding young
						4/11/2022	Inactive	Possibly fledged
BUSH-03	Bushtit	3/1/2022			50	3/8/2022	Active	Nest building

Nest ID	Species	Discovery Date	Discovery Stage	Location Description	Buffer Size (ft)	Updates	Update Status	Update Stage
			Nest building	10-ft above ground level in a coast live oak along road.		3/29/2022	Inactive	Nest failed – possibly never completed
ANHU-02	Anna's hummingbird	3/7/2022	Feeding young	15-ft high on a slightly horizontal south-pointing willow branch	25	3/22/2022	Inactive	Possibly fledged
BUSH-04	Bushtit	3/7/2022	Nest building	13-ft above ground level on west facing side of a big old willow.	25	3/22/2022	Active	Incubating
						4/27/2022	Active	Feeding young
						5/4/2022	Inactive	Possibly fledged
ANHU-03	Anna's hummingbird	3/7/2022	Nest building	About 13-ft above ground level in an ash tree, in the understory. About 10-ft out on a branch to the west.	30	3/8/2022	Active	Incubating
						3/29/2022	Inactive	Nest failed – possibly abandoned after storm
BUSH-05	Bushtit	3/9/2022	Nest building	In tangle of dead dodder vines. Approximately 4-ft above ground level, between willow trunks.	50	3/22/2022	Active	Incubating
						4/27/2022	Active	Feeding young
						5/18/2022	Inactive	Fledged
BUSH-06	Bushtit	3/9/2022	Nest building	9-ft above ground level in low hanging dead limb of willow. The limb is covered in dead leaves and old willow fluff that conceals the nest well.	50	4/5/2022	Active	2 adults in immediate vicinity
						4/22/2022	Inactive	No activity at nest, nest appears damaged perhaps due to storm event or predation.
ANHU-04	Anna's hummingbird	3/9/2022	Feeding young	20-ft above ground level in a 3-inch dbh dead willow as it intersects another smaller dead willow.	50	3/14/2022	Active	Feeding young
						9/7/2022	Inactive	Possibly fledged
CASJ-03	California scrub-jay	3/10/2022	Nest building	5-ft above ground level in the southern quadrant of a mature mulefat.	65	5/24/2022	Inactive	Possibly fledged
ANHU-05	Anna's hummingbird	3/10/2022	Nest building	10-ft above ground level in 6-inch dbh willow, on dead overhanging east facing branch.	50	3/14/2022	Active	Incubating
						4/6/2022	Active	Incubating
						6/7/2022	Inactive	Possibly fledged
BUSH-07	Bushtit	3/11/2022	Nest building	20-ft above ground level in overhanging oak branch above west side of trail.	40	6/7/2022	Inactive	Possibly fledged
ANHU-06	Anna's hummingbird	3/11/2022	Incubating	Located approximately 20-ft above ground level on west facing branch on oak tree.	100	4/5/2022	Inactive	Nest failed – appears to have been abandoned.

Nest ID	Species	Discovery Date	Discovery Stage	Location Description	Buffer Size (ft)	Updates	Update Status	Update Stage
LEGO-01	Lesser goldfinch	3/14/2022	Nest building	8-ft above ground level in the northwest fork of a smallish willow tree.	30	4/5/2022	Active	Incubating
						6/7/2022	Inactive	Possibly fledged
COHA-01	Cooper's hawk	3/14/2022	Nest building	40-ft above ground level in a <i>Fraxinus</i> in a large pile of twigs.	150	3/29/2022	Active	No birds seen on the nest but a bird called and a female flew to a snag and preened, about 50' South of the nest. Current nest stage unclear.
						4/18/2022	Active	Observed copulation close to the nest
						5/16/2022	Inactive	Potentially fledged
CASJ-04	California scrub-jay	3/15/2022	Nest building	6.5-ft above ground level in northwest quadrant of a mature mulefat.	65	3/29/2022	Active	Incubating
						4/4/2022	Active	Incubating
						6/7/2022	Inactive	Possibly fledged
CASJ-05	California scrub-jay	3/15/2022	Nest building	6-ft above ground level on the south side of an old willow, mixed with wild cucumber	40	3/22/2022	Active	Nest building
						5/3/2022	Inactive	Fledged
BUSH-08	Bushtit	3/16/2022	Nest building	15-ft above ground level in a cottonwood, southwest quadrant near approximate center of canopy.	50	3/20/2022	Active	Unable to locate, bushtits in tree and female was foraging
						4/13/2022	Inactive	Possibly fledged
CASJ-06	California scrub-jay	3/16/2022	Incubating	12-ft above ground level in canopy of large dense elderberry.	50	3/22/2022	Active	Incubating
						4/25/2022	Inactive	Nest failed. Nest has been torn apart.
ANHU-07	Anna's hummingbird	3/17/2022	Nest building	On south facing branch of willow tree approximately 15-ft above ground level.	50	4/5/2022	Active	Incubating
						6/7/2022	Inactive	Possibly fledged
CATH-02	California thrasher	3/17/2022	Incubating	In pepper tree in southeastern edge, 6-ft above ground level.	50	3/22/2022	Active	Incubating
						4/25/2022	Inactive	Nest may have failed, droppings not visible and cup doesn't have much volume.
ANHU-08	Anna's hummingbird	3/17/2022	Nest building		50	4/5/2022	Active	Incubating
						4/13/2022	Active	Incubating

Nest ID	Species	Discovery Date	Discovery Stage	Location Description	Buffer Size (ft)	Updates	Update Status	Update Stage
				Approximately 8-ft above ground level on a south facing branch of a small elder tree.		5/11/2022	Inactive	Possibly fledged
CASJ-07	California scrub-jay	3/18/2022	Nest building	Seen taking nesting material into a cluster of mulefat	65	5/19/2022	Inactive	Possibly fledged
BUSH-09	Bushtit	3/21/2022	Feeding young	10-ft above ground level hanging from willow branches.	30	5/31/2022	Inactive	Possibly fledged
RCPA-01	Red-crowned parrot	3/21/2022	Nest building	In a willow cavity, approximately 18-ft above ground level	0	5/31/2022	Inactive	Nest failed
WEBL-01	Western bluebird	3/21/2022	Nest building	In south facing cavity in a mature sycamore. Easily seen from the trail just south of the tree. Nest is approximately 20 feet up.	50	4/6/2022	Active	Nest building
						4/25/2022	Inactive	Nest failed. No activity observed at nest after two hours of observation.
BUSH-10	Bushtit	3/22/2022	Nest building	15-ft above ground level in two-trunked broken-topped willow, at uppermost leaf bunch in northern most trunk.	30	3/29/2022	Active	Incubating
						4/11/2022	Inactive	Potentially fledged
						4/18/2022	Active	Feeding young
						5/12/2022	Inactive	Possibly fledged
BUSH-11	Bushtit	3/23/2022	Nest building	5-ft above ground level in dead branches between large fork of dead willow.	50	4/5/2022	Active	Nest building
						4/11/2022	Inactive	Nest failed – nest is shredded / disheveled.
BUSH-12	Bushtit	3/23/2022	Nest building	About 7-ft above ground level in small willow along north edge of new channel.	50	5/2/2022	Inactive	Nest failed. Appears to have been ripped open. No activity at nest.
SPTO-01	Spotted towhee	3/24/2022	Nest building	Near base of small dead willow.	50	4/4/2022	Active	Nest building
						5/20/2022	Inactive	Possibly fledged
SOSP-01	Song sparrow	3/29/2022	Nest building	Nest likely on or near ground within dense hemlock and mulefat.	40	3/30/2022	Active	Nest building
						5/20/2022	Inactive	Possibly fledged
HOFI-01	House finch	3/31/2022	Nest building	Over 150 feet up in the north side of a telephone pole. No buffer because of extreme height and location (within 10 ft of parking lot), any disturbance from the work the restoration crew would do is extremely unlikely.	0	5/20/2022	Inactive	Possibly fledged

Nest ID	Species	Discovery Date	Discovery Stage	Location Description	Buffer Size (ft)	Updates	Update Status	Update Stage
CASJ-08	California scrub jay	4/1/2022	Incubating	Nest is located approximately 4ft high in an Elderberry shrub on the edge of DG-2 and the Side Slopes.	50	4/21/2022	Inactive	Nest failed. The nest is empty of eggs or young and likely failed. Parents are not present in the nearby area.
CALT-01	California towhee	4/4/2022	Nest building	Near ground at base of mulefat	50	4/12/2022	Active	Didn't observe nest directly
						5/4/2022	Active	Feeding young
						5/31/2022	Inactive	Possibly fledged
BUSH-13	Bushtit	4/4/2022	Nest building	30-ft above ground level in willow, north end of Mining Pit.	40	5/12/2022	Inactive	Possibly fledged
ANHU-09	Anna's hummingbird	4/5/2022	Incubating	6-ft above ground level in a willow snag.	50	4/19/2022	Active	Incubating
						6/2/2022	Inactive	Possibly fledged
CALT-02	California towhee	4/5/2022	Nest building	In a large oak tree east of trail approximately 20-ft above ground level.	50	4/25/2022	Inactive	No activity after two hours of observation.
SOSP-02	Song sparrow	4/5/2022	Incubating	1-ft above ground level in young mulefat fork, hidden in overgrown poison hemlock and prickly sow-thistle.	50	5/23/2022	Inactive	Possibly fledged
KILL-01	Killdeer	4/6/2022	Incubating	Located on the ground within the side slope behind a piece of driftwood	50	4/21/2022	Active	Incubating
						4/22/2022	Active	Fledglings close to nest
						5/11/2022	Inactive	Fledged
ALHU-01	Allen's hummingbird	4/7/2022	Nest building	Approximately 20-ft above ground level in oak tree.	50	5/31/2022	Inactive	Possibly fledged
CALT-03	California towhee	4/11/2022	Incubating	In mugwort patch at shin height.	50	5/20/2022	Inactive	Possibly fledged
KILL-02	Killdeer	4/12/2022	Incubating	Located on the ground approximately 1-ft northeast of wild radish.	50	4/13/2022	Inactive	Fledged. Observed four healthy chicks foraging with parents.
CATH-03	California thrasher	4/14/2022	Nest building	3-ft above ground level in mulefat.	65	5/24/2022	Inactive	Possibly fledged
ANHU-10	Anna's hummingbird	4/15/2022	Incubating	20-ft above ground level in southeast quadrant of a mature willow.	45	5/4/2022	Inactive	Possibly fledged
CASJ-09	California scrub-jay	4/15/2022	Nest building	3-ft from ground, near the center of a mulefat	65	4/18/2022	Active	Pair observed in area
						5/4/2022	Active	Incubating

Nest ID	Species	Discovery Date	Discovery Stage	Location Description	Buffer Size (ft)	Updates	Update Status	Update Stage
						5/27/2022	Active	Feeding young
						6/17/2022	Inactive	Possibly fledged
CALT-04	California towhee	4/18/2022	Incubating	In overgrown poison hemlock at tree fall.	50	5/19/2022	Inactive	Possibly fledged
CALT-05	California towhee	4/22/2022	Incubating	In California sagebrush shrub just south of fence, 1-2-ft above ground level.	50	7/15/2022	Inactive	Possibly fledged
BUSH-14	Bushtit	4/25/2022	Nest building	30-ft above ground level in a willow tree.	40	5/10/2022	Active	Feeding young
						5/31/2022	Inactive	Possibly fledged
BEWR-01	Bewick's wren	4/25/2022	Feeding young	In mulefat thicket north of trail.	50	5/2/2022	Inactive	Fledged
BEWR-02	Bewick's wren	4/25/2022	Feeding young	1-ft above ground level in a hollow on the east side of a horizontal willow branch.	50	5/27/2022	Inactive	Possibly fledged
CALT-06	California towhee	4/25/2022	Nest building	In arroyo willow.	50	5/20/2022	Inactive	Possibly fledged
SPTO-02	Spotted towhee	4/25/2022	Feeding young	Seems to be at center of several large willow trunks.	50	5/12/2022	Active	Adult heard making trill sounds from nest location.
						5/18/2022	Inactive	Fledged
CATH-04	California thrasher	4/25/2022	Feeding young	Located in mulefat, approximately 4-ft above ground level.	50	5/9/2022	Inactive	Possibly fledged
CASJ-10	California scrub jay	4/25/2022	Nest building	In willow canopy	30	6/28/2022	Inactive	Fledged
CALT-07	California towhee	4/26/2022	Nest building	Inside a mulefat thicket.	50	5/19/2022	Inactive	Possibly fledged
OATI-01	Oak titmouse	4/26/2022	Feeding young	North face of an Sambucus, 6-ft from ground in cavity.	50	5/31/2022	Inactive	Possibly fledged
CALT-08	California towhee	4/26/2022	Incubating	Approximately 0.5-ft above ground level in <i>phacelia distans</i> thicket.	50	5/10/2022	Inactive	Nest failed. Nest is empty and tilted. CALT pair still in area, likely will be renesting if not already.
MODO-01	Mourning dove	4/26/2022	Incubating	15-ft above ground level in a horizontal crack in a willow.	0	4/26/2022	Inactive	Observed nest being raided by CASJ and subsequently abandoned.

Nest ID	Species	Discovery Date	Discovery Stage	Location Description	Buffer Size (ft)	Updates	Update Status	Update Stage
BUSH-15	Bushtit	4/26/2022	Nest building	5-ft above ground level in pepper tree.	50	5/12/2022	Inactive	Nest failed. No activity at nest and appears tattered.
SOSP-03	Song sparrow	4/27/2022	Fledglings close to nest	In riparian vegetation along east side of Alta Dena drainage.	50	5/16/2022	Inactive	Possibly fledged
ACWO-02	Acorn woodpecker	4/27/2022	Incubating	Nest is located in the lower of two cavities located in the cottonwood bordering the trail, approximately 15-ft above ground level.	30	5/20/2022	Active	Incubating
						6/1/2022	Active	Feeding young
						6/21/2022	Active	Feeding young
						8/10/2022	Inactive	Possibly fledged
EUST-01	European starling	4/28/2022	Feeding young	Nest hole is on the eastern side at the top of the pole, approximately 100-ft above ground level.	0	6/13/2022	Inactive	Possibly fledged
CAQU-01	California quail	4/28/2022	Nest building	Located within the north side of a planting basin under Mullein.	100	6/2/2022	Inactive	Nest failed
RCPA-02	Red-crowned parrot	4/29/2022	Incubating	Located on east side of a large willow 30-ft above ground level.	0	5/24/2022	Active	Feeding young
						8/11/2022	Inactive	Possibly fledged
CAQU-02	California quail	4/29/2022	Nest building	Located on the northern side of planting basin containing mule fat, mares tail, mustard and grasses.	100	6/2/2022	Inactive	Nest failed – abandoned
CAQU-03	California quail	5/2/2022	Nest building	Located on the ground on an east facing slope in Johnson Field. The nest is hidden in ambrosia and sand spurrey.	100	6/2/2022	Inactive	Fledged
CAQU-04	California quail	5/2/2022	Incubating	In a patch of pepperweed surrounded by a willow/mulefat alliance.	90	5/12/2022	Inactive	Possibly fledged
BUSH-16	Bushtit	5/3/2022	Nest building	About 10-ft above ground level in Goodding's willow in new planting zone.	50	5/18/2022	Active	Flock of bushtits observed in area.
						6/17/2022	Inactive	Fledged
BUSH-17	Bushtit	5/4/2022	Unknown	6-ft from ground in a thicket of Salix. Adults observed near nest, did not determine nesting stage. Appears complete.	50	5/13/2022	Inactive	No activity observed
NUWO-01		5/5/2022			50	5/20/2022	Active	Feeding young

Nest ID	Species	Discovery Date	Discovery Stage	Location Description	Buffer Size (ft)	Updates	Update Status	Update Stage
	Nuttall's woodpecker		Feeding young	Located on a large broken limb on the NW side of a mature willow tree. Nest cavity is facing east and is approximately 30-ft up.		6/17/2022	Inactive	Possibly fledged
HOWR-01	House wren	5/6/2022	Unknown	In the underside of one of the dead willow branches approximately 20-ft up and facing away from the trail.	30	6/17/2022	Inactive	Possibly fledged
SPTO-03	Spotted towhee	5/10/2022	Feeding young	Female observed feeding fledged chicks in mixed patch weeds and grasses.	40	6/17/2022	Inactive	Fledged
ANHU-11	Anna's hummingbird	5/11/2022	Incubating	Approximately 4-ft up on an east facing branch of a small ash tree.	50	9/7/2022	Inactive	Possibly fledged
CALT-09	California towhee	5/11/2022	Incubating	In Conium patch under willows	50	5/16/2022	Active	Pair active in area
						7/15/2022	Inactive	Possibly fledged
CAQU-05	California quail	5/12/2022	Incubating	In a thicket of Conium likely at the bottom of a mature mulefat.	50	5/18/2022	Inactive	Nest failed due to CASJ predation.
CAQU-06	California quail	5/12/2022	Nest building	Nest is located on the ground and made of small twigs, grass, and dirt at the base of a crop of mugwort next to one of the paths the crew uses in the WoUS.	80	6/7/2022	Inactive	Nest failed
CALT-10	California towhee	5/13/2022	Feeding young	Nest observed in wild radish under willow tree	50	6/7/2022	Inactive	Possibly fledged
MODO-02	Mourning dove	5/16/2022	Incubating	6-ft high in between a split trunk of a broken top willow snag, behind dense poison hemlock blooms.	30	7/15/2022	Inactive	Fledged
SOSP-04	Song sparrow	5/16/2022	Feeding young	Approximately 1-ft above ground level in vegetation.	40	6/7/2022	Inactive	Possibly fledged
HOWR-02	House wren	5/18/2022	Feeding young	Fledglings present in the vegetation on a west facing slope.	0	7/27/2022	Inactive	Fledged
NUWO-02	Nuttall's woodpecker	5/19/2022	Feeding young	In a cavity on a 15-ft high snag on S side of trail.	50	6/13/2022	Inactive	Possibly fledged
CAQU-07	California quail	5/19/2022	Incubating	On the ground near the base of three willows.	100	6/13/2022	Inactive	Possibly fledged

Nest ID	Species	Discovery Date	Discovery Stage	Location Description	Buffer Size (ft)	Updates	Update Status	Update Stage
ACWO-03	Acorn woodpecker	5/20/2022	Incubating	In the dead portion of a willow located on the western side of the wash. There appear to be 2 nests, one in the uppermost cavity and one in the cavity directly below the top cavity.	50	9/7/2022	Inactive	Possibly fledged
ACWO-04	Acorn woodpecker	5/20/2022	Incubating	In the dead portion of a willow located on the western side of the wash. There appear to be 2 nests, one in the uppermost cavity and one in the cavity directly below the top cavity.	50	9/7/2022	Inactive	Possibly fledged
CALT-11	California towhee	5/20/2022	Feeding young	Dense willow patch near the W bank.	30	7/28/2022	Inactive	Possibly fledged
COYE-01	Common yellowthroat	5/23/2022	Incubating	1-ft from ground in a fork of several Rumex species	50	5/24/2022	Inactive	Nest failed. No COYE activity in area.
MODO-03	Mourning dove	5/23/2022	Nest building	Nest located on a large north-east facing limb of a sycamore tree approximately 12-ft above ground level.	50	7/12/2022	Inactive	Nest failed
MODO-04	Mourning dove	5/23/2022	Incubating	Against trunk of Mexican fan palm in a small cavity made by adjacent frond bases. SE side of tree.	40	7/15/2022	Inactive	Possibly fledged
CATH-05	California thrasher	5/24/2022	Feeding young	Located in a honeysuckle bush that is surrounding a sycamore tree. Nest is approximately 5-ft high.	50	7/27/2022	Inactive	Possibly fledged
BHGR-01	Black-headed grossbeak	5/27/2022	Incubating	Along the bank of DG-4 drainage area in a 9-ft cottonwood near the top of the tree.	50	6/23/2022	Inactive	Possibly fledged
CALT-12	California towhee	5/27/2022	Feeding young	About 4-ft off the trail in some mule fat.	50	9/6/2022	Inactive	Possibly fledged
SOSP-05	Song sparrow	5/31/2022	Feeding young	In a poison hemlock/ mustard thicket somewhere between the mulefat and large lowland willow near point.	40	9/7/2022	Inactive	Possibly fledged

Nest ID	Species	Discovery Date	Discovery Stage	Location Description	Buffer Size (ft)	Updates	Update Status	Update Stage
CALT-13	California towhee	5/31/2022	Feeding young	5-ft above ground level, in a mulefat, north quadrant.	50	7/12/2022	Inactive	Possibly fledged
CASJ-11	California scrub jay	6/1/2022	Fledged	Heard begging calls and observed feeding. No actual nest observed, it was likely in a mulefat.	0	N/A	N/A	N/A
MODO-05	Mourning dove	6/2/2022	Incubating	Nest located approximately 12-ft up in the crook of a NE facing branch in a mature sycamore.	35	9/30/22	Inactive	Likely fledged based on timing.
BLPH-01	Black phoebe	6/2/2022	Feeding young	Nest located under the walking bridge at the SW corner.	30	8/16/2022	Inactive	Possibly fledged
NUWO-03	Nuttall's woodpecker	6/3/2022	Incubating	In a dead sycamore directly adjacent to the trail.	30	8/4/2022	Inactive	Fledged
HOWR-03	House wren	6/3/2022	Feeding young	In a coast live oak directly adjacent to the trail.	30	8/10/2022	Inactive	Possibly fledged
COYE-02	Common yellowthroat	6/7/2022	Feeding young	Nest near base of a willow snag surrounded by thick weedy veg.	40	9/6/2022	Inactive	Possibly fledged
CALT-14	California towhee	6/7/2022	Feeding young	Located in poison oak bushes south of sycamore tree.	30	7/12/2022	Inactive	Possibly Failed - Predated
HOFI-02	House finch	6/7/2022	Feeding young	~17-ft up in the north fork of a large eucalyptus tree that splits at base.	40	9/6/2022	Inactive	Possibly fledged
