SQMP Implementation

Part III-Section E.5

The Malibu Creek Watershed (MCW) is a very cohesive organization that runs on close coordination and frequent communication from four cities, the grant appointed MCW Coordinator, and County and Caltrans representatives. However, as we have begun implementing TMDLs it has become apparent that we need participation from all responsible agencies contributing flows into our watersheds.

Through the TMDL Implementation Plan Working group and also North Santa Monica Bay Task Force meetings, two other agencies sharing the Malibu Creek Watershed have become more closely involved in the WMC: County of Ventura Watershed Protection Division and the City of Thousand Oaks. A lot of progress has been made in this direction, however there is still room for improvement.
